Strategic Road Connectivity and Trade Improvement Project (SRCTIP)

FINAL REPORT

On

Addendum Resettlement Action Plan (RAP) of

Kamala-Dhalkebar-Bagmati (KDB) Road Section

October, 2026

ACRONYMS AND ABBREVIATIONS

AH	Asian Highway
AIDS	Acquired Immune Deficiency Syndrome
CBS	Central Bureau of Statistics
CDC	Compensation Determination Committee
CDO	Chief District Officer
CFUGs	Community Forest User Groups
COI	Corridor of Impact
CSC	Construction Supervision Consultant
DAO	District Administration Office
DCC	District Coordination Committee
DCID	Development Cooperation Implementation Divisions
DIA	Direct Impact Area
DLRO	District Land Revenue Office
DoR	Department of Road
EIA	Environmental Impact Assessment
ESF	Environmental and Social Framework
ESIA	Environmental and Social Impact Assessment
ESMF	Environmental and Social Management Framework
ESS	Environmental and Social Standard
FGDs	Focus Group Discussions (Added)
FPIC	Free Prior and Informed Consent
FW	Formation Width
GESU	Geo-Environment and Social Unit
GoN	Government of Nepal
GRM	Grievance Redress Mechanism
HHs	Households
HIV	Human Immune Deficiency Virus
HW	Highway
IIA	Indirect Impact Area
IPs	Indigenous Peoples
KDB	Kamala- Dhalkebar-Bagmati

KDP	Kamala Dhalkebar Pathlaiya
LRO	Land Revenue Office
MOPIT	Ministry of Physical Infrastructure and Transport
NEFIN	Nepal Federation of Indigenous Nationalities
NGO	Non-Governmental Organization
NEA	Nepal Electricity Authority
NHDR	Nepal Human Development Report
NLSS	Nepal Living Standard Survey
NNM	Nagdhunga-Naubise-Mugling
NRs	Nepalese Rupees
OHS	Occupational Health Safety
PAHs	Project Affected Households
PAPs	Project Affected Persons
PCU	Project Coordination Unit
PIC	Project In-Charge
PIP	Priority Investment Plan
PLI	Poverty Line Income
PMU	Project Management Unit
R&R	Resettlement and Rehabilitation
RAP	Resettlement Action Plan
RCC	Reinforced Cement Concrete
RF	Resettlement Framework
RoW	Right of Way
SRCTIP	Strategic Road Connectivity and Trade Improvement Project
SRN	Strategic Road Network
ToR	Term of Reference
WB	World Bank
ZoI	Zone of Influence

GLOSSARY OF TERMS

S.N.	Description
Compensation	Compensation is the payment to the PAPs in cash or kind for private property acquired by the project, based on replacement value as defined by the Compensation Determination Committee (CDC). However, the depreciation and salvage value will not be deducted while computing compensation with respect to the replacement value.
Compensation Determination Committee	The district-level committee will be established in each road district under Section 13(2) of the Land Acquisition Act, 203 4B.S. (1977), to determine replacement value and compensation rates against the property acquired under the Act.
Cultural heritage	Resources with which people identify as a reflection and expression of their constantly evolving values, beliefs, knowledge and traditions.
Cut-off Date for Eligibility to Entitlement	RAP verification survey along with enumeration date was January-October, 2025 which was the cutoff date principally. However, the actual cutoff date for this RAP addendum was the CDC meeting date 14th October 2025 and 11 & 12 November, 2025. This was disclosed through issuance of CDC notice on same date and dispatched concerned ward and provided directly to the project affected family (PAF)
Entitled Person	Any person who is entitled to get compensation due to loss of Privately owned Assets and other rehabilitation assistance.
Forced Eviction	The permanent or temporary removal against the will of individuals, families, and/or communities from the homes and/or land which they occupy without the provision of, and access to, appropriate forms of legal and other protection, including all applicable procedures and principles.
Involuntary resettlement	Project related land acquisition or restrictions on land use may cause physical displacement (relocation, loss of residential land or loss of shelter), economic displacement (loss of land, assets or access to assets, including those that lead to loss of income sources or other means of livelihood), or both. The term involuntary resettlement refers to these impacts. Resettlement is considered involuntary when affected persons or communities do not have the right to refusal and acquisition nor restrictions on land use that result in displacement.
Land acquisition	All methods of obtaining land for project purposes, which may include outright purchase, expropriation of property and acquisition of access rights, such as easements or rights of way. Land acquisition may also include: (a) acquisition of unoccupied or unutilized land whether or not the land holder relies on such land for income or livelihood purposes; (b) repossession of public land that is used or occupied by individuals or households; (c) project impacts that result in land being submerged or otherwise rendered unusable or inaccessible. Land includes anything growing on or permanently affixed to land such as crops, buildings and other improvement, and appurtenant waterbodies.
Livelihood	Livelihood refers to the full range of means that individuals, families, and communities utilize to make a living, such as wage-based income, agriculture, fishing, and other natural resource-based livelihoods, petty trade, and bartering.

Project Affected Person	Any person directly affected by the project through the acquisition of assets belonging to him/her or his/her household or community. This includes any person whose rights, standard of living, subsistence and income-generating capacity are adversely affected through the acquisition of assets, whether Full / Partial, or permanent/temporary.
Project Affected Household	The group of people residing in one house and operating as a single economic unit, who are affected by the project. The project affected families are included widow or unmarried daughters (biological or adopted), matured son, adopted son over the age of 18 years who is looking personal business as livelihood management and or acting as household head in absence of par- will be entitled to rehabilitation measures.
Restrictions on land use	Limitations or prohibitions on the use of agricultural, residential, commercial or other land that are directly introduced and put into effect as part of the project. These may include restrictions on access to legally designated parks and protected areas, restrictions on access to other common property re- sources, restrictions on Land use within utility easements or safety zones.
Rehabilitation	The measures taken to mitigate identified social impacts, including compensation, displacement assistance, rental stipend, business disturbance allowance and support allowance
Replacement Cost	A method of valuation yielding compensation sufficient to replace assets. This constitutes the current market value of the asset plus transactional costs.
Titleholders	The person who owns the project-affected land and/or building and has ownership certificate and the person who is authorized by law to receive the compensation Granted for the acquisition of land.
Non-Titleholders	Individuals residing on rented or encroached land.
Tenant	A person who does not have legal ownership of a property and is occupying/using the property of a titleholder according to the stipulations of the Land Act, 2021 (1964).
Vulnerable Groups	Vulnerable groups refer to individuals who, due to existing challenges, may be disproportionately affected by the project and could potentially face increased hardship. These individuals often have special needs and their circumstances may worsen as a result of the project.

1. Project Background

The Government of Nepal (GoN) has requested the World Bank (WB) to support the improvements and upgrading of existing roads that are of vital importance to the country's economy and regional connectivity through Strategic Road Connectivity and Trade Improvement Project (SRCTIP). SRCTIP has four components that are; component-1 Trade Facilitation (IBRD/IDA credit US\$ 29.4m)¹ is to under Ministry of Industry, Commerce and Supplies (MOICS) and component-2 Regional Connectivity Improvement Component (IDA credit US\$ 350.1m), component-3 Institutional Strengthening Component (IDA credit US\$ 70.1m), component-4 Contingency and Emergency Response (IDA credit US\$ 0.00 m) under Ministry of Physical Infrastructures and Transport (MoPIT). Improvement of existing Nagdhunga-Naubise-Mugling (NNM-94.7) road and bridges and upgrading of Kamala-Dhalkebar-Pathlaiya (KDP-130) road and bridges is under component-2. The KDP road section spanning 130 km, begins at the Kamala River and ends at the Pathlaiya junction of Bara district. More specifically, the KDP road crosses the Dhanusha, Mahottari, Sarlahi, Rautahat and Bara districts, is a major access route to Birgunj in the south-west, Kathmandu in the north and various other parts of western Nepal. This section is a vital component in the national road network of Nepal, linking major tourist and industrial cities such as Kathmandu, Pokhara, Chitwan, Lumbini and Biratnagar. It is also an integral part of the Asian Highway 2 (AH2). The project also encompasses significant road improvement works minimum 4 lane road standard along with upgradation of 61 bridges and the 15 small bridges are converted into box culvert out of 76 existing bridges. Besides, 27 major junctions' improvement, 49 Bus Bays and 5 Truck Lay Bays, and 5 VUP (including 10 PUP) in five locations (at Birendra Bazar, Lalbandi, Nawalpur, Hariwon and Naya Road) considering the rapid urbanization along the project section, with plans to widen the road to 4 to 6 lanes in urban locations. The project signing and effectiveness date is 17 July & 24 October, 2020 respectively and project completion date is 15 July, 2027.

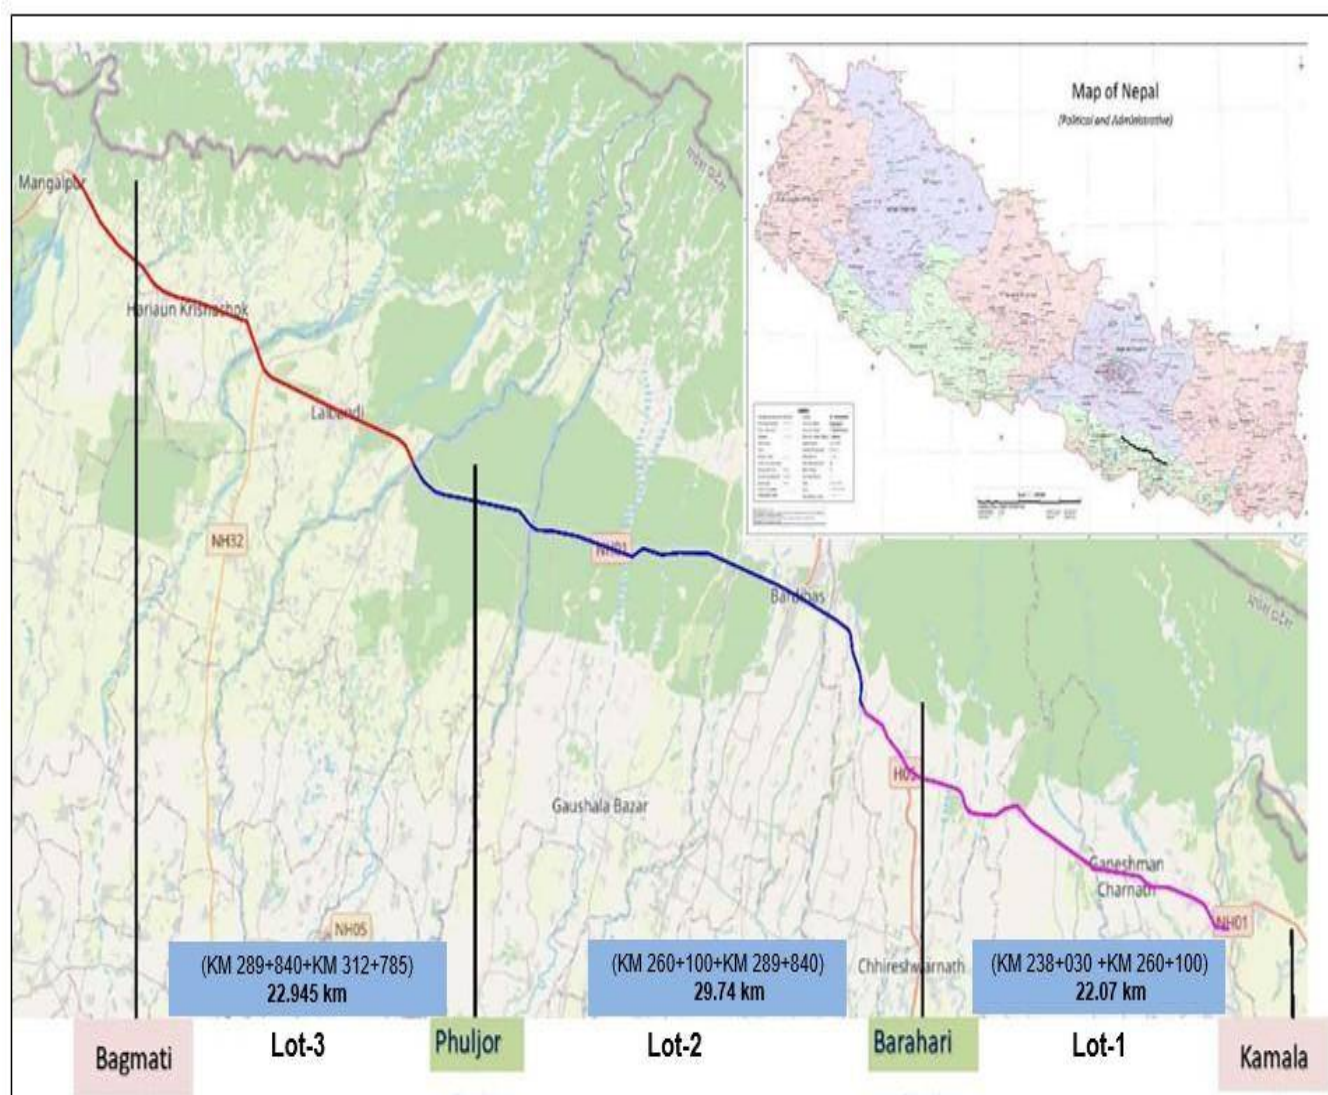

This RAP Addendum updates the approved RAP (2024) based on verification surveys conducted in 2025. It provides updated information on project impacts, affected households, eligibility, entitlements, implementation arrangements, and budget requirements for the KDB Road Section. Information on compensation, demolition activities, consultations, and implementation progress is included solely to provide context on the status of implementation and does not alter the commitments, entitlements, or obligations established under the original RAP and this Addendum.

2. Project Descriptions

The Kamala-Dhalkebar-Bagmati section (KDB 77KM.) of KDP road, also known as East-West (Mahendra) Highway under the Strategic Road Connectivity and Trade Improvement Project (SRCTIP) is aimed to upgrading from current two lanes to minimum four lanes configuration along with, the service road in densely populated built-up area and expected to significantly enhance road capacity and efficiency, improve safety, and facilitate regional trade and connectivity. The Environment Social Impact Assessment (ESIA) has already been approved dated September, 2025 and clearly mention about preparation of Resettlement Action Plan (RAP-June 2024) to address 64 project affected households (PAHs) who are going to lose their private structures (66) and 216 public structures. Now the RAP verification has been completed and identified 219 (PAHs) that needs to be compensated, relocated and rehabilitated during project implementation phase. The KDB road section crosses the Dhanusha, Mahottari, and Sarlahi district with divided into three lots. The project location, along with the proposed road alignment and lots is shown in **Figure 1-1**.

¹Note: This Component will be implemented through Ministry of Industry, Commerce and Supplies (MOICS).

Figure 2-1: Road Location Map of Project

The salient features and technical specification of KDB project is mentioned below in Table 1-1.

Table-1.1 Salient Features of the KDB Road Project

Name of the Sub-Project	Upgrading of Kamala-Dhalkebar-Bagmati section of Kamala-Dhalkebar-Pathlaiya Road
Province	Madhesh
Start Point	Kamala Bridge (Ch: 236+698) 26°52'40.73"N latitude and 86° 8'24.20"E longitude
End Point	Bagmati (Ch: 312+785) 27°11'57.66"N latitude and 84°58'50.76"E longitude
Name of Districts and Municipalities	Dhanusa: Dhanusadham, Ganeshman Charnath, Mithila Mahottari: Bardibas, Gausala Sarlahi: a) Ishworpur municipality b) Lalbandi municipality c) Hariwon municipality d) Bagmati municipality

Major Settlements	Portaha, Godar Bazar, Birendra Bazar, Bhimwan, Dharapani, Puspapur, Dhakebar, Badahari, Lalgadh, Bardibas, Phuljor, Ranigunj, Lalbandi, Nawalpur, Hariwon, Bagmati,
-------------------	---

Table 1-2: Technical Specifications of the Project

Technical Specification	Existing	Proposed
Classification	Class II	Class II as per NRS 2070 and Class I as per Asian Highway Standard (AH2)
Length of Road	77 km	77 km
Right of Way	50 m	50 m
Carriageway Width	7.0 m (Average)	18 m (7.0 m on either side with 4 m center median), further 6.5 m service road width on either side of roads in urban areas.
Formation Width	(10 –12) m	24 m
Shoulder Width	1.2 m	2.5 m
Side Drain (width)	Side Drains are available at Dense settlement area	U-shape drain provision is given in the pro- posed design.
Design Standard		
Standard		NRS-2070
Design Speed		100 kmph
Gradient (Maximum and Minimum)		5%
Minimum Radius of the Horizontal Curve		Maximum as per design and minimum should be at least 870 m as per NRS-2070.
Camber		2.50%
Super Elevation		7%
Crossings		
Bridges	Out of 76 nos. of Bridges (61 bridges will be upgraded and 15 existing small bridges will be converted into Box Culverts). One four-lane bridge of Dudhaura is under construction.	
Culverts	122 nos. (existing)	
VUP/PUP	5 VUP (including 10 PUPs) in 5 Locations (Birendra Bazar, Lalbandi, Nawalpur, Hariwon and Naya Road)	
Causeway (will not remain)	21 nos. (All these Causeways are converted into Box Culverts)	
Elephant Crossings	8 as Animal passes	
Medium sized animal crossings	10 as Animal passes	
Junction Improvement		
Major Junction Improvement	27	
Bus Bays/Shelters	49	
Truck- Lay Bays	(At 5 locations: 268+700, 324+300, 327+800, 347+800, 366+300 Chainages)	
Service Roads	34,704 meters at 19 Locations	
Tractor/Cart Crossings	18 Locations	

Traffic Data (January 2022, Base Year Traffic)	
AADT, Vehicle/day	13249 at the Kamala-Dhalkebar section and 8306 at the Nijgadh-Pathlaiya section

3. Rational for Updated Resettlement Action Plan

The RAP addendum builds upon the foundation laid by the original RAP, maintaining its core principles, objectives, and framework of original Resettlement Action Plan (RAP). The rational of this RAP addendum reflects changes that have occurred since the original plan was developed, unresolved deed transferring and demarcating RoW issues including modifications in project design and maintaining updated census and socio-economic data, and evolving stakeholder concerns. It serves as an extension and refinement of the original plan, incorporating verified data, updated entitlements, and feedback gathered during the joint verification as provisioned in original RAP (section-8 of executive summary). This ensures continuity while enhancing the plan's accuracy, responsiveness, and compliance with both regulatory requirements and community expectations. The RAP verification is being conducted during project pre-construction phase to cover recent change in socio-economic characteristics and resettlement impacts. This RAP addendum has been developed to mitigate adverse impacts and compensation payments timely for private losses and provide development benefits to persons and communities affected by the project. The road upgrading work is confined within RoW, ensuring that no additional private land is required for the project.

The overall KDP Road Corridor is approximately 130 km in length and is being implemented in two sections: (i) the Kamala-Dhalkebar-Bagmati (KDB) East Section (77 km) and (ii) the Bagmati-Pathlaiya (BP) West Section (53 km). This RAP Addendum has been prepared specifically for the KDB East Section, where civil works procurement and RAP verification activities have progressed. Accordingly, the Addendum updates the approved RAP (2024) based on verification surveys conducted for this section and reflects the latest information on affected households, structures, public assets, compensation requirements, and implementation arrangements. Impacts associated with the BP West Section will be verified and addressed through separate resettlement planning updates as implementation progresses. Therefore, this RAP Addendum should be read in conjunction with the approved RAP (2024) and serves as a supplementary document rather than a replacement for the RAP covering the entire KDP Road Corridor.

The RAP Addendum aims to ensure continued alignment with national regulations and international safeguards, and to address gaps identified during the verification and implementation phases. The revision also incorporates lessons learned and feedback from affected communities to enhance the effectiveness and fairness of resettlement measures.

4. Objectives and Scope of the Updated Resettlement Plan

The RAP addendum has been prepared in line with the World Bank's Environmental and Social Standard (ESS)-5 on Land Acquisition, Restrictions on Land Use, and Involuntary Resettlement, and relevant regulations of the Government of Nepal (GoN), which emphasize avoiding or minimizing involuntary resettlement as per the Land Acquisition Act 1977. The aim of this RAP addendum is to ensure that economic or physical displacement results from the project. The specific objective of this RAP is as follows:

- To ensure accuracy, transparency, and stakeholder confidence in the resettlement process and current changes occurred in the community.
- To updates the resettlement impacts as per design modification and validation of affected persons, assets, and entitlements through a participatory process involving both project authorities and community representatives.
- To identify discrepancies, resolve outstanding grievances, and incorporate necessary adjustments based on field realities.
- To avoid involuntary resettlement or, when unavoidable, minimize involuntary resettlement by exploring project design alternatives.
- To avoid forced eviction due to project road intervention.
- To mitigate unavoidable adverse social and economic impacts by: (a) providing timely compensation for loss of assets at replacement cost, and (b) assisting displaced persons to restore their livelihoods.

- To devise special mitigation measures for poor and vulnerable persons who are likely to be affected disproportionately.
- To ensure that the resettlement activities are planned and implemented with appropriate disclosure of information, meaningful consultation, and the informed participation of those affected person

The scope of this RAP addendum is to confine within RoW (50m.) of KDB road section (77 km) upgrading from 2 lane to 4/6 lane of KDP Road. The resettlement impacts have little change than the impact identified in original RAP. In total 3 private main structures and 56 extended part temporary structures are not included in the scope of this RAP. As a major scope of this RAP addendum, the total (219) Project Affected Households (PAHs) and extended part temporary structures along the RoW of Kamala Bagmati road section residing Ganeshman-Charnath, Dhanusadham, Mithila Bardibas, Gausala Ishworpur, Lalbandi Hariwan and Bagmati municipalities of Dhanusa, Mahottari and Sarlahi district. Beside this, Stakeholder consultations to the entire project cycle for project information sharing and address people's concerns, views and grievances as part of the citizen engagement is also the scope of this updated RAP.

5. Methods and Cut-off date of RAP Addendum

The resettlement team was mobilized in KDB road on January, 2025 prior to civil works on particular location and process for compensation distribution of affected entitles. The team verified project impacts against the original RAP and detailed design report. A joint verification was conducted by contractor's safeguard team, CSC team (Social Development Expert and Highway engineer) along with representative of PIU and Department of Urban Development and Building Construction (DUDBC).

During the RAP verification works, the social team accompanied with the technical team have measured the distance of structures from the centerline of RoW and checked all the project affected structures at a ground included in original RAP and identified new structures and enumerated following same principle of original RAP. The cost estimation was done in the same principle of original RAP but based on current district rate (2082-2083) valuation. In a similar manner, public structures have also been verified and listed. After the mobilization of contractors and the construction supervision consultant (CSC), the social safeguard team from CSC and contractor including dedicated engineers from PIC and social safeguard expert form DCID have involved in RAP verification survey team and re-verification of affected households from original RAP along with enumerated new structures of RoW dated from January-October, 2025. Principally the RAP verification survey along with enumeration date January-October, 2025 was the cutoff date. However, the actual cutoff date for this RAP addendum was the CDC meeting date 14th October 2025 and 11 & 12 November, 2025. This was disclosed through issuance of CDC notice on same date and dispatched concerned ward and provided directly to the project affected family (PAF) .

Eligibility of newly identified affected structures and assets was verified through field surveys, stakeholder consultations, review of available records, and validation by local authorities. Eligibility was determined in accordance with the original RAP and the approved cut-off date. Structures established after the cut-off date were excluded from compensation and assistance. All verified impacts and eligibility decisions were documented and jointly reviewed by the Contractor, CSC, PIC, and DCID before being incorporated into the RAP Addendum inventory.

Although all identified impacts are located within the legally established 50-meter Right of Way (RoW), eligibility for compensation and assistance is based on verified project impacts and occupancy prior to the cut-off date, rather than land ownership status alone. Consistent with the original RAP and ESS5, all eligible affected persons, structures, assets, and livelihood sources identified through the verification survey will receive compensation, assistance, and rehabilitation support in accordance with the Entitlement Matrix.

The KDP Road Project (approximately 130 km) is being implemented in two sections: (i) the Kamala-Dhalkebar-Bagmati (KDB) East Section (77 km) and (ii) the Bagmati-Pathlaiya (BP) West Section (53 km). This RAP Addendum covers only the KDB East Section, for which the civil works contract has been awarded, and RAP verification activities have been undertaken. Accordingly, the RAP verification survey conducted between January and October 2025 was limited to the KDB East Section.

As a result, impacts located within the BP West Section were not included in the scope of the current RAP Addendum. These excluded impacts comprise 3 affected private structures (2 in Rautahat District and 1 in Bara

District), 56 Project Affected Households (PAHs) associated with temporary structure extensions, and 36 affected public structures (24 in Rautahat District and 12 in Bara District). The exclusion of these impacts does not affect the eligibility of the affected households or assets for compensation and assistance. Rather, these impacts fall outside the geographical and contractual scope of the present RAP Addendum and will be verified, assessed, and addressed under the resettlement planning and implementation arrangements applicable to the BP West Section once implementation activities for that section commence.

The legal framework is in compliance with original RAP, all the relevant legislation and policies i.e., Land Acquisition Act 1977, Land Acquisition, Rehabilitation and Resettlement Policy 2071(2015), Public Road Act 1974, Land Use Policy 2015 and World Bank Environment and Social Standards (ESS-5). Comparison of WB's ESS-5 with GoN's legislations related to lands was done to find out gaps and to propose mitigation measures to fulfil these gaps. Regarding grievances mechanism, will be applicable as provisioned in original RAP.

Regarding cadastral review and deed transfer status, the Right of Way (RoW) is inherent with the GoN of Nepal, however cadastral maps of 6 locations (Dhalkebar, Badahari, Bagmati, Lalbandi, Chapur and Nijgadh) is not matched. The cadastral map of all six locations has been collected to examine the status of RoW and deed transfer status across the KDP road section. The unsolved deed transferring and demarcating issues at six locations of the RoW is under process with the help of land survey department. The letter has already been issued July, 2025 and the cadastral maps of six locations has been reviewed and carried out site visit by surveyor. The deed transfer works has initiated for require design structures and approach road constructions activity respectively.

The deed transferring issues are also discussed in recent GRC meeting dated 23 December, 2025 and built common understanding among concerned stakeholders, project authorities and project level GRC.

As institutional arrangements as mentioned in original RAP like the project (KDB) East section, under the Department of Roads (DoR Ministry of Physical Infrastructure and Transport (MoPIT), has the overall responsibility for execution of this RAP addendum. The key responsibility of Development Cooperation Implementation Division (DCID-PCU) is finally rechecked, and review of verified RAP addendum with the help of Social Development Expert. The Project Coordinator, heading the Project Coordination Unit (PCU) of the DCID will be responsible for overall project coordination, management and endorsement of this RAP addendum. The Project Office headed by Project In-Charge (PIC) is responsible for overall implementation of this RAP at the project level. The PIC has worked with respective Chief District Officers to constitute the Compensation Determination Committees (CDC).

5.1. Community Participation

As an integral part of the Resettlement Action Plan (RAP) addendum preparation process, a series of both informal and formal public consultations were conducted with key stakeholders at the local level. These consultations actively engaged ward-level authorities and representatives of Project Affected Households (PAHs) to ensure that the concerns and expectations of directly impacted communities were adequately captured and reflected in the planning process.

Participants included representatives from the District Administration Office and local government institutions, including the concerned municipalities of Ganeshman Charnath, Mitila, Bardibas, Ishworpur, Lalbandi and Hariwan. All these stakeholders were consulted during January-October 2025. These interactions aimed to align the resettlement planning framework with applicable institutional mandates and administrative procedures.

The consultations revealed a broadly cooperative and constructive atmosphere among the project-affected population. During the consultations, Project Affected Persons (PAPs) expressed their willingness to support the implementation of the Kamala Dhalkebar-Bagmati road section and indicated their readiness to vacate and relocate structures and properties situated within the designated Right-of-Way (RoW).

Furthermore, PAPs acknowledged that their structures are predominantly located on government-owned land and expressed an understanding of the cash compensation and entitlements framework applicable to their affected assets, in accordance with the provisions outlined in this RAP addendum. Summary of consultation is in annex-4

6. Socio-economic Baseline

The socio-economic baseline condition of verified (219) project affected households (PAH) is almost similar with original RAP, because verified project affected households are from the same socio-economic background. Altogether 219 has been verified as directly project affected households by the KDB road (East) upgrading project intervention. The family size of the project affected HHs is (5.7), which is higher than national average of (4.8). The total population of project affected family is around (1200) with (51%) males and (49%) females. During verification all project affected households are in contact and there are not any absentee households. In terms of caste/ethnicity, (61) PAHs (30%) are Brahmins, followed by (54) PAHs (27%) are Chhetri, (52) PAHs, (25%), Adivasi/Janajatis (Indigenous people), and (37) PAHs (18%), from Dalits. The economically active population is (44.22 %) whereas main occupation of project affected household is agriculture followed by business, service, and foreign employment. The overall literacy rate is (84%) followed by male (48.5. %) and female (36.5 %). The average annual income of project affected households is NRs. (50200) which is lower than national level NRs. (72908). About 3 % households were identified as below poverty line income households.

6.1 Demography

This analysis gives the basic socio-economic profile of the 219 households affected by the project. It highlights key points like population details, cultural background, caste/ethnicity, main occupations, and income and expenses. The purpose is to provide a clear picture of the communities involved in the project

6.1.1 Population and Household

In the project area, 219 households with a total of 1200 affected people were identified. Of these, 51.25% are male and 48.75% are female, which is slightly lower than the national female average of 51%. The average household size is 5.7 %, higher than the national average of 4.8. Details are shown in Table 6-1.

Table 6-1: Population Distribution of the project affected surveyed HHs

District	Municipality	Household	Population			Family Size
			Male	Female	Total	
Danusha	Ganeshman Charanath Municipality	20	66	72	139	6.95
	Dhanusadham Municipality	11	32	28	60	5.45
	Mithila Municipality	64	165	154	319	4.98
Mahottari	Bardibas Municipality	9	29	24	53	5.8
	Gaushala Municipality	8	25	11	36	4.5
Sarlahi	Ishworpur Municipality	14	35	33	67	4.7
	Hariwon Municipality	32	98	92	190	5.9
	Bagmati Municipality	33	88	91	179	5.4
	Lalbandi Municipality	28	77	80	157	5.6
Total		219	615	585	1200	5.47
Percentage			51.25	48.75	100	

Baseline Survey September,2025

6.2 Caste/Ethnicity

The 219 households across the three lots. Of these, 82 are in Lot-1, 32 in Lot-2, and 105 in Lot-3. The largest group overall is the Tarai caste community, with 91 households, making up 41.55% of the total. In Lot-1, this group is the clear majority, representing 67.07% of the households. The table below shows overall composition of the cast and ethnicity.

Table 6.2: Caste and ethnic composition of PAHs

S.N.	Caste/Ethnicity	Lot-1		Lot-2		Lot-3		Total		Remarks
		HH	%	HH	%	HH	%	HH	%	
1	Brahmin/Chhetri	7	8.53	5	15.6	43	40.95	55	25.11	
2	Hill Janjati	12	14.64	13	40.6	31	29.52	56	25.57	
3	Tarai Janjati	1	1.25	-	-	1	0.95	2	0.91	
4	Hill Dalit	7	8.53	1	3.1	2	1.90	10	4.56	
5	Tarai Dalit	-	-	2	6.25	2	1.90	4	1.82

	Total	82	100	32	100	105	100	219	100	

Baseline Survey September,2025

6.3 Educational Status of PAHs

The data profiles the educational attainment of 219 households (HH) across three housing lots. Overall, Secondary education is the most common qualification, held by 39.72% of all households. Those who are simply "literate" form the second largest group at 25.57%, followed by those with a Primary education (14.61%) and an SLC certificate (10.95%). Illiterate households make up 9.13% of the total.

Table-6-3: Population Distribution by Education Level

S.N.	Educational Status	Lot-1		Lot-2		Lot-3		Total		Remarks
		HH	%	HH	%	HH	%	HH	%	
1	Illiterate	20	24.39	-	-	-	-	20	9.13	
2	literate	13	15.85	10	31.25	33	31.42	56	25.57	
3	Primary	20	24.39	12	37.5	-	-	32	14.61	
4	Secondary	29	35.36	10	31.25	48	45.71	87	39.72	
5	SLC	-	-	-	-	24	22.85	24	10.95	
	Total	82	100	32	100	105	100	219	100	

Baseline Survey September,2025

6.4 Religion:

The community across all three lots is predominantly Hindu, with 73.05% (160 out of 219) of all households following this religion. Buddhism is the second most common faith, practiced by 26.02% of total households. Other religions are nearly absent, with only a single Muslim household (0.45% of the total) recorded in Lot-3, and no Christian households in any lot.

Table 6-4: Distribution of PAPs by Religion

S.N.	Religion	Lot-1		Lot-2		Lot-3		Total		Remarks
		HH	%	HH	%	HH	%	HH	%	
1	Hindu	57	69.51	26	81.25	78	74.28	160	73.05

6.5 Occupation Status of the PAHs

In the project area business is overwhelmingly the primary occupation, accounting for 158 households, which is 72.15% of the total population (219 HH). Agriculture is the second most common (21 HH, 9.59%), followed by Wages (13 HH, 5.94%), and Foreign Employment (11 HH, 5.02%). The detail status is given below.

Table 6-5: Main Occupation of Household

S.N.	Occupation	Lot-1 HH	Lot-2 HH	Lot-3 HH	Total HH	%	Remarks
1	Agriculture	9	2	10	21	9.59	
2	Business	52	21	85	158	72.15	
3	Services	4	-	6	10	4.56

	Total	82	32	105	219	100	

Baseline Survey September,2025

6.6 Monthly Average Income Level of Project Area PAPs

According to the Nepal Living Standard Survey (NLSS Survey 2021), the revised official poverty line in 2022-23 is estimated NRs.72, 908 per person per year. It has also aggregated the food items and non-food items and the expenses required to be above the poverty line. Accordingly, the income required for providing adequate calories (2,236 kilocalorie) for an average Nepali to be active is Rs. 35,029 at 2023 prices. For non-food items, for an average, the average income required is Rs.37, 879 at 2022/23 prices. Based on the official poverty line income at NRs. 72,908 per capita per year, 6 households with 32 population fall below poverty level among 219 project affected surveyed households. The average annual income of below poverty line population is NRs. 50200 per person per year. Based on annual income around 3 percent HH lies below poverty line.

Table: 6-6 Yearly Average Income Range

S.N.	Yearly Income Range	Lot-1	Lot-2	Lot-3	Total		Remarks
		HH	HH	HH	HH	%	
1	<50200	3	2	1	6	2.73	
2	50,200-150,000	5	5	2	12	5.47	
3	150,001-254,001	18	4	48	70	31.96

5	Greater than > 391720						
	Total	82	32	105	219	100	

Baseline Survey September,2025

6.7 Monthly Expenditure Level of Project Area PAPs

Nearly half of the households (46.57%, or 102 households) spend more than NPR 35,000 each month, making this the largest spending group. Another 42.92% (94 households) fall in the NPR 20,001-35,000 range, showing that most families have moderately high to high expenses.

Table: 6-7 Household Monthly Expenditure Level

7. Comparison of National and WB ESS-5 Requirement

This section presents gap assessment of Land Acquisition Act 1977 of Nepal vis-à-vis requirements of WB ESS standards and gap fulfilment efforts taken by the Project in relation to key aspects of RAP preparation and implementation

Table 7-1. Comparison of WB's ESS5 and Land Acquisition Act 1977 Requirements for RAP

Theme	Provision within the <i>Land Acquisition Act (LAA), 1977</i>	Requirements under WBG ESS 5	Gaps and How it is to be addressed
Avoidance or impact minimization	The LAA allows land acquisition for “public purposes”. It does not specify avoiding or minimizing resettlement	ESS 5 requires avoidance/minimizing of involuntary resettlement by exploring project design alternatives	The Project will avoid and minimize impacts wherever possible. An alternative analysis was carried out as a part of ESIA
Impact Mitigation	The LAA provides for compensation of land and assets and in certain cases of landlessness, for provision of replacement land. The CDC chaired by the Chief District Officer (CDO) determines criteria.	Provision of compensation at replacement cost along with rehabilitation assistance and commitment to improve and/or restore livelihoods to pre-project levels.	A negotiation process with affected PAFs will take place in a group under the supervision of CDC to reach mutually acceptable compensation. If it fails, an independent assessment of replacement cost will be conducted and provided this Report for the CDC's consideration
Timing of Compensation	Executing agency may acquire land by depositing money with the competent authority for compensation determination.	Possession of acquired land and related assets will be taken up by the project only after compensation has been made available and, where applicable, resettlement sites and moving allowances have been provided to the displaced persons in addition to compensation	Land access will be initiated only after payment of full compensation (except in case of legally disputed cases, if any). Forced evictions will not be carried out. PAFs will be given reasonable time (up to 12 months) to identify temporary accommodation within project area until they are able to build their new replacement houses.
Eligibility	Legally, provisions are made for landowners and registered tenants under the Constitution and the LAA. However, there are no provisions for informal rights holders, unregistered landowners, squatters, undocumented tenants, other family members or landless.	Includes: those with formal legal rights to the land/assets; those with no legal rights but with a claim to land recognized under national or customary law; or those with no recognizable legal right to land or assets	This RAP considers all PAFs including those without any recognizable legal titles (for compensation of affected structures and livelihood restoration support).
Informed Consultation and Participation	During the LA process, the CDO is the appellate authority. Otherwise, the LAA does not require on-going consultations with affected persons and other stakeholders.	Disclosure of relevant information; meaningful consultations with affected persons communities, and other stakeholders; consultations must be on-going and inclusive	PAFs were informed about the intended acquisition of their land and consulted multiple times in this process of preparation of RAP. Their preferences for resettlement and rehabilitation options were incorporated in this RAP.
Livelihood Restoration	The legal frameworks for resettlement provide for rehabilitation of displaced settlements and compensation to affected persons through land-based resettlement strategies. However, land-based livelihood is not used as a criterion for application of such land-based	Provision of compensation at replacement cost along with rehabilitation assistance and commitment to improve and/or restore livelihoods and standard of living to pre-project levels.	Both non-land and land-based livelihood restoration strategies are considered in this RAP.

Theme	Provision within the <i>Land Acquisition Act (LAA), 1977</i>	Requirements under WBG ESS 5	Gaps and How it is to be addressed
	resettlement strategies wherever possible.		
Grievance Redress Mechanism	The affected entities may approach the CDO and/or the Ministry of Home Affairs within a defined period for compulsory expropriation. Under Clause 25.7, appeal against the compensation may be directly filed with the Ministry of Home Affairs. However, entities other than legally registered landowners and tenants are not considered.	The project is required to establish a grievance redress mechanism, which should seek to resolve concerns promptly, using an understandable and transparent consultative process that is culturally appropriate and readily accessible.	The project has established a GRM which will be used for this purpose as well. The GRM also includes access to legal redress at any stage in the process.
Special assistance for vulnerable households	The landless families with legal ownership can get additional compensation at the discretion of the CDC.	Particular attention will be paid to the needs of the poor and the vulnerable as a part of the resettlement process, however no specific package or entitlement for vulnerable groups.	Vulnerable PAFs are identified in this RAP, and specific benefits are included for them.
Support during transition	No such provision in the LAA.	Transitional support should be provided as necessary to all economically displaced persons, based on a reasonable estimate of the time required to restore their income-earning capacity, production levels, and standards of living.	The RAP makes provisions for transitional support for all PAFs who are physically displaced.

8. Resettlement Impacts of RAP Addendum

The Right of Way (ROW) of this Highway was declared (50 meters owned by Nepal government) by the Road Act 1974 as being a National Highway and published notice of Nepal Gazette dated 1977. According to engineering design, the existing RoW is sufficient to construct the proposed 4-lane, and 6-lane roads in rural and urban areas. There is no need to acquire additional private land to accommodate the project. However, the RAP verification works covered up to RoW and verified 83 structures from original RAP and newly identified 136 structures so the total 219 private structures including extended part temporary structures were verified as resettlement impacts of this RAP addendum. Project team has made efforts to avoid or minimize involuntary resettlement impacts by adopting a technical design using the best utilization of the available width of 50 meters. The original RAP identified 64 Project Affected Households (PAHs) based on the design information and field assessments available at the time of its preparation. During the RAP verification survey conducted between January and October 2025, a detailed structure-by-structure assessment was carried out throughout the project corridor. The survey verified previously identified impacts and identified additional affected structures, temporary extensions, business frontages, and roadside developments that were not fully captured in the original RAP. The increase in PAHs from 64 to 219 does not result from any expansion of the project footprint beyond the approved RoW. Rather, it reflects the findings of detailed field verification, community consultations, engineering assessments, and updated asset inventories undertaken during preparation of this RAP Addendum. The updated inventory therefore provides a more accurate representation of project impacts and eligible affected households.

To ensure the accuracy of the updated inventory and avoid inclusion of ineligible assets, all newly identified structures were subjected to a multi-stage verification process. This included physical field verification, consultations with affected households and neighboring communities, review of available local records, validation by ward representatives, and confirmation that the affected structure existed prior to the approved cut-off date. Only structures meeting the eligibility criteria established under the original RAP and ESS5 have been included in the final inventory

Regarding resettlement impacts, the project has caused physical displacement for (22) households, both physical and economic displacement, affecting (64) households, economically displacement has affected (29) households, and the most common impact has minor or partial loss category is (104).

In addition to impacts on private structures and Project Affected Households (PAHs), the project will affect public and community assets located within the Right of Way (ROW), including religious structures, public service facilities, utility infrastructure, and other community assets. As these facilities provide important services to local communities, the RAP Addendum includes measures for their relocation, restoration, or replacement prior to construction to ensure continuity of services and, where feasible, improvement of existing facilities.

Regarding the public and government structures, 153 has been verified. Out of verified (153) public structures, temples-(38), waiting sheds-(37), Chautaras, (25) and government structures are (53) see Annex-2. All public structure relocation cost is included in BoQ as in PS item. Contractors' team will be prepared plan and profile, typical drawing, cost estimate and identified relocation sites consultation with community. Regarding the public service utilities, (2241) electric pole has been identified whereas (20) water users and sanitation committee has been identified along with cost estimation. The resettlement impacts are given in tabular form.

Table 8-1 Resettlement Impacts

Original RAP, 2024					RAP Addendum - December, 2025 ²

8.1 Specific Notes on Impacted HH

Summary of Lot 1- Impacts

- ❖ As per original RAP verified 30 main structures
- ❖ In addition, 52 newly identified structures during the verification process
- ❖ Therefore, after verification, the total number of affected households is 82.

Summary of Lot 2- Impacts

- ❖ As per the original RAP, there were a total of 19 structures that were verified
- ❖ After field verification, 13 structures were identified
- ❖ Therefore, after verification, the total number of affected households is 32.

Summary of Lot 3- Impacts

- ❖ As per the original RAP, a total of 34 structure Were verified
- ❖ In addition, 71 new private structures were identified during the verification process.
- ❖ Therefore, after verification, the total number of affected households is 105.

8.1.1: Reconciliation and Traceability of Affected Households

To ensure transparency and traceability between the approved RAP (2024) and this RAP Addendum, a detailed reconciliation of affected households and structures was undertaken as part of the verification process. The reconciliation identifies PAHs/structures retained from the original RAP, newly identified PAHs, and records from the original RAP that were not retained following field verification. Non-retained records have been categorized as dismantled, removed, not found, saved, or reclassified as public structures, with the basis for each status documented in the Traceability Annex. Newly identified PAHs were included following verification of project

⁶ 36 public structures from BP section are not included in this updated RAP

impact and eligibility in accordance with the approved RAP and applicable cut-off date. These traceability categories reflect the outcome of verification and do not, by themselves, constitute closure of any applicable compensation, assistance, or other entitlement obligations.

The detailed PAH/structure-level reconciliation, including the status and basis for changes from the original RAP inventory, is provided in the Traceability Annex 5.

For confidentiality and personal data protection purposes, PAH names and other personal identifiers are not disclosed in the annexes. Traceability across the affected household inventory, vulnerable household inventory and reconciliation records is maintained using the respective Lot, annex serial number, chainage and location references. These references allow affected records to be cross-referenced while protecting personal information.

There total 2241 electric pole and 21 water users and sanitation committee have been identified during RAP verification works. Previously, it was 2221 in original design phase RAP.

9. Mitigation Measures

Major effort has been made to avoid involuntary resettlement wherever possible by adopting alternative design options that minimizes social impacts. The technical team has decided to follow the RoW of the existing road, which helps to minimize the involuntary resettlement impact. To reduce the social impacts of the project, a step-by-step mitigation approach has been adopted, following the hierarchy of avoiding, minimizing, mitigating, and, if necessary, compensating or offsetting the impacts. One key part of this strategy is providing cash compensation to affected individuals and households. This includes payments for lost assets, support for relocation, rental allowances, and compensation for disruptions to businesses. Compensation is calculated based on the current market value of the affected assets, along with any additional costs involved in replacing them. The final replacement value is determined by the Compensation Determination Committee (CDC), after holding several rounds of consultations and negotiations with the people directly affected by the project. Beyond financial compensation, the mitigation plan also focuses on helping people rebuild their lives and livelihoods. This includes support for income-generating activities like wage work, farming, fishing, trading, and other small-scale businesses so that households can restore their standard of living to at least the level they had before being displaced.

No additional land is required as present technical design is limited to the 50m RoW. In addition, the 50m RoW was declared in the name of government 48 years ago as per Gazette notification of 2034-03-20 BS (04-07-1977 AD). The 50m Right of Way (RoW) of the EWH has already been declared in Government of Nepal. As such, no compensation is envisaged for lands within the 50m ROW.

The cash compensation, however, will be available to project affected households who can claims to loss assets by road upgrading works within the RoW. Beside this the provision of displacement allowances like structures dismantle allowance, business disruption allowance, rental stipends allowance and livelihood restoration training are also included in compensation scheme. Dalits, ethnic minorities, women-headed households, HHs falling below the poverty line income and HHs with aged members are categorized as vulnerable. Moreover, livelihood restoration training will provide vulnerable and displaced households. Similarly, roadside vendors are also included in livelihood restoration program and employment opportunities as provisioned in original RAP as accordance of DoR-updated ESMF and WB ESS-5. Public structures will be relocated after development of appropriate re-medial relocation plan and conduct consultation for re-planting the religious trees with some ritual practices for Chautara.

Effective operation of the GRM is integral part of citizen engagement and responses mechanism of project. The Project office is responsible for the ongoing monitoring of resettlement activities as well as project grievances lodged by community people. The social mobilizers will assist the project with grievances record

keeping and acknowledgement. The Social Development and Resettlement Specialist of CSC will facilitate the GRC meeting and prepared resolution statement. He is also responsible to facilitate the implementation of RAP and will generate quarterly reports for DoR-DCID and the World Bank.

10. Cost Estimation and Relocation Arrangement

Compensation cost estimation and relocation arrangement are the major activities of RAP implementation. The significant direct impact of the project is loss of private/public structures and have conducted several consultations with local community and local stakeholders. The cost estimation has been done based on current district rates (2082-083) with the standard norms of Department of Urban Development and Building Construction (DUDBC). The cost has been estimated for full loss and partial loss. The fully affected households have received rental stipend allowance and require temporary relocation while partially affected persons have stayed in the same houses as an unaffected portion is still viable for use, and no relocation would be required. During community consultations, the majority of project affected persons prefer cash compensation for all types of private assets losses and relocation and rehabilitation arrangements for public property losses. Identification and confirmation of relocation sites is ongoing through consultation.

11. Compensation Disbursement

As provisioned in Land Acquisition Act- 2034 B.S (1977 AD) the Compensation Determination Committee (CDC) has been formed and determined compensation rates, identified and verified actual owners of loss properties. While determining the compensation, the CDC has considered all types of losses incurred by persons in the structures acquisition process including displacement assistances. The CDC have determined the replacement value of all affected assets following a series of investigations and collection of market rates from Bank and input from the Department of Urban Development and Building Construction (DUDBC). Compensation has included all assistance as per the Entitlement Matrix, which was provided for CDC's considerations and, upon determination of value representing replacement, has adopted as needed. Compensation payments have done into the bank accounts of the project-affected households. Furthermore, business disruption allowance and rental stipends allowance has also been given to affected persons who have operated their business and fully loss households require rental services.

Cash compensation has been provided to affected households based on their entitlement. The package includes cash compensation for the loss of assets at replacement value as ratified by the Compensation Determination Committee (CDC). The compensation includes all allowances and livelihood restoration training including employment in construction as per the Entitlement Matrix for replacement value. The total compensation package for structures will normally be provided in two tranches for practical reasons 50% prior to the dismantling of structures and 50% after dismantling the structures.

12. Entitlement Policy Framework

The entitlement policy framework has been developed for this project based on the provision of Land Acquisitions Act, 2034 B.S. and World Bank ESS-5. This entitlement policy framework adopted two units of entitlements, titleholder and non-title holder for loss of individual's private structures. While determining the compensation, the CDC have considered the loss incurred by persons due to acquisition process, shifting of residence or any kind of displacement such as shifting business to another place of both title-holder and non-title holder.

This framework also covers the public structures and government structures which is affected by the project. Rehabilitation and relocation plan will be developed and carried out consultation with local community as well as relevant departmental authorities. In the case of community property, all affected properties will be relocated or rehabilitated during this project implementation phase in consultation with the local community, specifically the PAPs, Dalits, IPs and vulnerable people.

While acquisition of private and public structures, property owners, their dependents, and community will affect and lose their livelihoods and social network. Considering all kind of losses, compensation, rehabilitation and relocation measures has been proposed to address this impact.

This entitlement matrix follows the same principles of original RAP. This RAP Addendum adopts the entitlement framework established under the approved RAP (2024). All displacement-related assistance, including rental assistance, shifting allowances, business disruption assistance, and other transitional support measures, shall be provided in accordance with the approved Entitlement Matrix. The CDC shall ensure consistent application of compensation rates and assistance measures during implementation. No affected household shall receive compensation or assistance less favorable than that provided under the approved RAP (2024). A detailed comparison between the entitlement matrix in the approved RAP (2024) and the entitlement framework adopted under this RAP Addendum was undertaken during preparation of this document. No material reduction in entitlements has been introduced through this RAP Addendum. Where compensation rates or implementation arrangements have been updated to reflect current valuation rates or implementation conditions, the principle most beneficial to the affected household shall prevail.

This RAP Addendum does not reduce the entitlements established under the approved RAP (2024). Transitional assistance measures, including rental assistance, shifting and dismantling assistance, business disruption assistance, and vulnerability assistance, are distinct entitlements that apply according to the nature and extent of impact and the eligibility of the affected household. Accordingly, a PAH may qualify for one or more forms of assistance, as applicable. Where rates have been updated to reflect current approved rates, the underlying entitlement remains unchanged. In the event of any inconsistency between the approved RAP and this Addendum, the provision that provides the greater benefit to the eligible PAH shall prevail.

The general entitlements of PAPs by ownership status and types of projects' impacts private and public assets are summarized in Table 12.1 below:

Table: 12.1 Entitlement Matrix Policy Framework⁸

Type of Loss	Entitlement Unit	Description of Entitlements	Implementation Measures
1. House and Associated Structures			
1.1 Loss of Residential House	Owners of the structures without legal title, including informal occupiers.	Partially impacted (i.e., the unaffected portion of structure is still viable for use and no relocation is required	• Cash compensation at replacement value for the affected portion • Affected households has notified 3 months in advance of the date of construction • Issuance of notice with the time of 35 days for compensation claim • Dismantling and shifting allowance equivalent to current wage rate base on structure size and type
	Owners of the structures without legal title, including informal occupiers losing their residence and who have to physically relocate.	Fully affected (i.e. structure is no longer viable for use)	• Cash compensation at replacement cost without depreciation for the entire structure • Rental stipend allowance equivalent to 3 months' minimum wage • Affected households will be able to salvage materials free of cost. • PAFs will be given reasonable time (up to 12 months) to identify temporary accommodation within project area until they are able to build their new replacement houses.

⁸ The assistance provisions in this matrix represent separate forms of support applicable according to the type and severity of impact and should not be interpreted as alternative rates for the same entitlement. Similarly, the three-month advance notification prior to construction/relocation and the 35-day notice for the compensation claim process apply to different stages and purposes of RAP implementation. This Addendum does not reduce the entitlements established under the approved RAP (2024); where any inconsistency in entitlement arises, the provision providing the greater benefit to the eligible PAH shall prevail.

1.2 Residential cum commercial structures	Owners of the structures without legal title, including informal occupiers	Marginal impact (i.e., unaffected portion of the structure is still viable for the use and no relocation is required. This will be confirmed by the implementing agency and concurred by the affected structure during the implementation	• Cash compensation at replacement cost without depreciation for the affected portion. • Business disruptions allowance equivalent to one-month minimum wage • Affected household will be notified 3 months in advance of the date of construction. • Affected households will be able to salvage materials free of cost.
1.3 Commercial structure	Owners of structures without title including informal occupiers losing their commercial and who have to partially relocate.	Partially affected	• Cash compensation at replacement cost without depreciation for the affected portion.
	Owners of structures without title including informal occupiers losing their commercial and who have to physically relocate	Fully affected (i.e., structure is no longer viable that can be relocated without being dismantled for use)	• Reconstruction, rental stipend and shifting allowance equivalent to two months' rent at current rate. • Allowance for loss of income. • Affected household has notified 3 months in advance of the date of construction. • Affected households will be able to salvage materials free of cost.

Type of Loss	Entitlement Unit	Description of Entitlements	Implementation Measures
1.4 Associated structures (Kitchen + store, bathrooms etc.	Owners of the structures without titleholders including informal occupiers	Loss of or damage to, assets	Cash compensation at full replacement Cost without depreciation. Affected households will be able to salvage materials without any cost.
Moveable and Extended part temporary Structures	Owners of the structures without titleholders including informal occupiers	Loss of or damage to, assets	Shifting cost as per size
1.6. Dismantling and transportation	Titleholder Non-Titleholder	Each displaced household will be entitled to dismantling and transportation assistance to dismantle structure and transport of their belongings	Displaced households will receive a housing displacement allowance. @20000 Decided during consultation with PAHs, based on national nominal monthly wage rate 19500 of 26 days @ RS.769 per day* 26 Structure dismantling and transportation assistance has been provided based on the type of structure on actual cost basis.
1.7 Vulnerable social categories and livelihood restoration	Non-Titleholder titleholder	Female headed and elder citizen, in the vicinity of the corridor of impact Dalit groups Marginalized group Landless households Independent handicapped and or old age households	Vulnerable social categories actually affected by the project will be benefitted onetime economic rehabilitation grant of one month's wages established by CDC Assistance in re- establishment and improvement of livelihood through skill training. Preferential employment on KDB road project
2. Community/Government Structures and Resources			

Community building and structures includes: waiting shed, community hall, toilets, temples, tap stand	Local Community Local Governments Provincial government Federal Government	Loss of damage to assets partially damage	Will be rebuilt by the project on public Land in coordination with the community.
3. General Counseling			
All project impacts	Persons within and adjacent to the road corridor	General counseling on project impacts; construction schedules and acquisition dates; valuation, compensation and grievance resolution mechanisms; construction employment procedures; and local development initiatives	This will be achieved through the periodic distribution of information sheets and consultation with local officials. Cooperation with GoN ministries and departments such as Department of Agriculture, Forest Local Development to support effective resource utilization and community development

13. Resettlement and Rehabilitation Assistance

Fully displaced residential and residential-cum-commercial PAHs are eligible for resettlement and rehabilitation assistance in accordance with the Entitlement Matrix, including rental stipend, shifting and dismantling assistance, and business disruption assistance, as applicable to the nature and extent of impact. Where these assistance measures have already been provided, they are reported as part of RAP implementation progress. Vulnerable and displaced households are also eligible for livelihood restoration support in accordance with the Entitlement Matrix. In addition, affected persons will be given priority, where feasible, for employment opportunities generated through project construction activities.

A. Shifting and Dismantling Allowance

The shifting and dismantling allowance has been provided based on the type of building. The affected private structures have been categorized into five categories made of different materials. During consultation with local stakeholders, the wage rate per day (15 days to 75 days 20000)⁹ has been determined based on the type of structure, subject to agreement from the CDC. The shifting and dismantling allowance has provisioned in total cost of building.

B. Business Disruption Assistance

As a part of the income restoration and rehabilitation for both physically/economically and economically displaced PAPs, the business disruption assistance has provisioned (@20000) and subject to agreement from CDC.

C. Vulnerable Households and livelihood restoration

The project vulnerable households comprising female-headed households, elderly people, and differently-abled households will get skill training and established entrepreneurship. They will be given additional priority for employment in construction works if they wish to work and meet the necessary criteria for the work available. Livelihood support schemes have been designed in consultation with PAPs and proportionate with the impact level on income sources and livelihood strategy. The livelihood support training will be conducted based on a need assessment and finalization of the training along with training modules, time frame, and place as a project benefit program. The sample of training includes beauty parlor, boutique mobile repair technician etc. The training program will be conducted in close coordination with municipality/ward-level institutions having relevant expertise and exposure.

Vulnerable PAHs identified through the verification process have been assessed against the vulnerability criteria established under the approved RAP. The identified vulnerable PAHs, their respective vulnerability classification, and the additional assistance for which they are eligible are presented in Annex 2. Vulnerability assistance is additional to other applicable compensation and resettlement assistance and will be provided in accordance with the Entitlement Matrix.

The Development Cooperation Implementation Division (DCID) Project Coordination Unit (PCU) will be responsible for the overall coordination and implementation of the livelihood restoration plan. The project coordinator and his/her safeguard team based in DCID/PCU will be responsible for overall coordination, planning, budgeting, approval and overseeing of the implementation of the livelihood restoration plan. The Geo-Environment and Social Unit (DoR-GESU) is responsible for compliance monitoring.

14. Summary of Compensation and Resettlement Budget

The summary of Compensation and resettlement budget including financing plan based on original RAP as RAP implementation cost includes all the expenses required to compensate for affected private assets including resettlement and rehabilitation assistance based on CDC decision. Compensation for lost

⁹ Rs. @769* 26 days, see labor act 2017 clause 106 sub-clause-1 national labor wage determination as per clause 107 effective from 17th July, 2025 ministerial decision made dated on 16th July, 2025.

assets will be provided at replacement cost. The livelihood restoration program, supporting assistance, project information dissemination and public/stakeholder consultation, including CDC/GRC meeting cost. Where families own affected assets, all payments have made in the account of the project affected persons. It is important to note that the budget will be financed from the Government's counterpart fund and approved by the Ministry of finance (MOF).

Table- 14.1 Summary of Compensation Cost estimation of RAP addendum

S. N	Items	Number of structures	Total Estimated Cost in (NRS)	Remarks
A. Private Structures				
1	Compensation of total private structures	219	68805846.12	Included dismantle and business disruption assistance
1.1	Cost of dismantle assistance (Rental if require)	22	@ 20000	
1.2	Cost of business disruption assistance	64	@ 20000	
B. Public Structures				
2	Public Structures		Cost is included in BoQ as PS item, cost estimation is being done	
3	Livelihood restoration program to vulnerable & indigenous people		Cost is included in BoQ as PS item as part of IPDP implementation	

Note: Public Structures:

The rehabilitation and relocation cost of the public/community structures/utilities has been allocated in Bill of Quantity (BoQ) and used Provisional Sum.

15. Organization Structure and Agencies Responsible

This section outlines the organizational framework for the implementation of the RAP addendum. An appropriate organizational setup for the implementation of the RAP addendum is necessary for effective coordination to ensure compliance with policies and procedures, resettlement activities and implementation of mitigation measures. To ensure the achievement of these activities, organization for RAP addendum implementation and management have occur at project levels. It also discusses monitoring requirements before concluding with an overview of the major planning, administrative, and logistical requirements for the successful implementation of the RAP addendum. As the project authority, DOR-DCID will retain overall responsibility for the implementation and management requirements as set out in RAP. Key activities to be undertaken to ensure effective implementation of resettlement, compensation and rehabilitation activities and implementation of procedures to: (i) continue to minimize adverse social impacts including acquisition of private assets throughout the planning, design and implementation phases; and (ii) verification to ensure accurate recording of all project-affected persons, by means of review of the census and asset verification and quantification exercises, and the issuing of identification.

Establishment of systems and procedures for the coordination of resettlement and compensation activities. Effective stakeholder engagement to: (a) ensure ongoing dissemination of project information to affected households; (b) structure, regulate and strengthen communication between roadside communities; and (c) involve affected communities and local government structures in social impact management, grievance resolution and monitoring. Distribution of copies of the approved Entitlement Policy and follow-up community meetings to ensure full awareness and comprehension of its content. Capacity-building initiatives to create a supportive environment for the implementation of RAP addendum activities, including training on accepted resettlement and rehabilitation practices.

Coordination with other relevant government agencies to ensure effective delivery of mitigation and rehabilitation support measures.

16. Monitoring and Reporting

The monitoring and reporting as provision in original RAP like, internal monitoring will be the responsibility of CSC and PIU. PCU will be undertaken on a regular basis with the help of a Social Development Specialist in the Development Cooperation and Implementation Division (DCID) and Social Development and Resettlement Specialist from Construction Supervision Consultant (CSC). Internal monitoring will focus on the verification of property valuation and rehabilitation, information dissemination and disclosure livelihood restoration program in accordance with the provision of the plan which will come under the jurisdiction of internal monitoring. Compliance monitoring will be the responsibility of Geo-Environment and Social Unit (GESU). Periodic compliance monitoring will be focused on overall implementation of RAP. External monitoring will be carried out by the independent agency. The external monitoring focuses on RAP implementation procedures, review of internal monitoring reports, review of compensation status, rehabilitation supports, information dissemination, livelihood restoration process and grievances redress mechanism (GRM).

17. RAP implementation Schedule

RAP implementation schedules include RAP verification works, notification for acquisitions and compensation claim. It also includes modality of compensation disbursement as per land acquisition act, 2034 and WB ESS-5 with preparation of data base and proper documentation to receive compensation and updates payment status. The livelihood restoration program, supporting assistance, project information dissemination and public/stakeholder consultation, internal / external monitoring including GRC meeting are the prime activities RAP implementation. The RAP implementation schedule and project affected details are given into annex.

Table 17.1: RAP Implementation Schedule

S.N	Milestone	Key outputs	Timeframe
1	Finalize addendum data	Reconciliation of PAH/structure counts across narrative/Table 8.1/Annexes; validation of CDC rate sheets; update entitlement quantifications.	Completed: December, 2025
2	engagement	Community consultations with newly affected PAHs	Completed: September, 2025
3	Payment readiness	Preparation and verification of payments dossier for all eligible PAHs.	Completed” December, 2025
4	Compensation & allowances	Pay replacement-cost compensation and applicable allowances (housing displacement, business disruption, moving/transport; vulnerable top-ups).	Ongoing compensation distribution started from December, 2025
5	Dismantling/relocation	PAPs salvage materials; provision of moving/transport; provide rental stipend where applicable; access restoration for businesses.	Ongoing , will be completed by June, 2026
6	Targeted LRP start	Enroll eligible HHs to LRP	41PAH by October 2026
8	Commence works	Contractor commences work after compensation payment and demolition.	Ongoing, started for sections where demolition and full compensation is made since December, 2025. No works ongoing in locations with outstanding compensation.
9	Monitoring & reporting	Monthly internal monitoring (payments, relocation, LRP enrolment, GRM) and semi-annual external monitoring.	Ongoing: Throughout RAP implementation
	Independent external monitoring		December, 2026
10	Completion audit & closure	Independent completion audit verifies living standards restored (or improved); RAP closure report issued.	Pending: Post implementation (prior to closing) (Jan, 2027)

Annex 5: Reconciliation and Traceability of Original RAP and RAP Addendum PAHs/Structures

Comparative table of Resettlement Impacts(retained and non-retained PAH) along with new PAH of KDP Road 77km.			
Lots	Original RAP		RAP Addendum
		Non-retained PAH	

	Verified PAH from original RAP	Dismantled	Removed	Not found	Saved	Public structures	Total	Retained	New	Total
1	85	3	28	6	18	0	55	30	52	82
2	43	0	11	6	5	1	23	20	12	32
3	75	1	23	5	12	3	44	31	74	105
Total	203						122	81	138	219
Category	Definition									
Dismantled	Temporary shelters recorded in the earlier RAP inventory that were dismantled by the PAHs themselves prior to the latest verification survey and were therefore no longer physically present at the time of verification.									
Removed	Structures/assets recorded in the earlier RAP inventory that were no longer physically present at the recorded location at the time of the latest verification.									
Not Found/Not Matched	Records from the earlier RAP inventory that could not be matched during the latest verification due to inconsistencies or errors in the earlier data, including incorrect chainage and/or PAH names. These records require reconciliation against the earlier RAP records.									
Saved	Structures/assets previously identified as affected in the earlier RAP inventory but subsequently verified as outside the actual project impact footprint or no longer affected due to avoidance/design adjustment, and therefore not requiring physical displacement under the verified project footprint.									
Public Structures	Structures/assets identified during reconciliation as being under public or institutional ownership/use rather than belonging to individual PAHs and therefore recorded separately for traceability.									
New PAH	PAHs identified during the latest verification that were not recorded in the earlier RAP inventory but were confirmed to be affected under the verified project impact footprint.									

Annex 5.1: Annex for non-retained PAH Lot- 1Annex for non-retained PAH			Remarks
Dismantled main private structures of Original RAP			
Unique ID	Ch.	Structure type	

L1-NR-1	238+400	Small shop	The PAH has been identified but structures were already dismantled and constructed their new structures outside of RoW
L1-NR-2	239+900	Wooden shop Ghumti	
L1-NR-3	251+890	Wooden shop Ghumti	
Removed from main private structures of original RAP			
L1-NR-4	238+040	Small shop	Most of them were small business shop attached huts. During RAP verification, the structures were already removed, and they were doing their business in their houses which is beyond the RoW
L1-NR-5	238+040	Small shop	
L1-NR-6	238+040	Small shop	
L1-NR-7	239+480	Small shop	
L1-NR-8	239+870	Small shop	
L1-NR-9	239+880	Small shop	
L1-NR-10	247+684	Small shop

L1-NR-13	257+129	Small shop	
L1-NR-14	257+147	Small shop	
L1-NR-15	257+300	Small shop	
L1-NR-16	257+320	Small shop	
Removed from extended part temporary structures of Original RAP			
L1-NR-17	253+990	Wood made shop, Plastic roof	The extended part temporary structures were removed by themselves
L1-NR-18	254+055	made with jasta and bamboo	
L1-NR-19	254+185	Attached with Mud Chhapro	
L1-NR-20	255+345	Attache with shop, Jasta roof	
L1-NR-21	255+350	Attached with RCC ghar, Zink sheet roof	
L1-NR-22	256+500	Bamboo workshop	
L1-NR-23	256+715	Only jasta and iron post	
L1-NR-24	257+140	Removal of cantilever of shop, with zink sheet	
L1-NR-25	257+335	Only jasta roof	

L1-NR-26	257+360	Iron post with jasta shop	
L1-NR-27	257+380	Iron post with jasta shop	
L1-NR-28	257+385	Iron post with jasta shop	
L1-NR-29	257+390	Bamboo with jasta shop	
L1-NR-30	257+470	Bamboo and jasta Tahara	
L1-NR-31	258+300	Jasta Tea stall	
Not found structure from extended part temporary structure from original RAP			
L1-NR-32	243+150	Attached with RCC House, jasta roof	These PAH are not found during the latest verification due to inconsistencies in the earlier RAP information, including chainage and/or household information, and has therefore been retained in the reconciliation record for traceability.
L1-NR-33	258+200	Bamboo and jasta Tahara	
L1-NR-34	258+290	Attache with Mud Mortar House	
L1-NR-35	256+ 104	Mud and stone wall with hatch and zink roof	
L1-NR-36	257+020	Mud and stone wall with zink slab	
L1-NR-37	258+615	Attached with Mud mortar House	
Saved structure from private and extended part structure of original RAP			
L1-NR-38	248+760	Attached with RCC House, Jasta roof	All of these private extended part structures has been saved due to negligible impact, just touch RoW,
L1-NR-39	251+780	Temporary shoy from jasta and wood	
L1-NR-40	253+935	Mud house, Jasta roof	
L1-NR-41	255+030	Brick masonry ,Zink roof	
L1-NR-42	255+040	Brick masonry toilet	
	255+055	Jasta shed	
	255+085	Iron staircase	
L1-NR-43	256+460	Wall of shop	
L1-NR-44	257+180	Truss structure	
L1-NR-45	257+275	Jasta shop	
L1-NR-46	257+335	Only jasta roof Tahara	
L1-NR-47	257+400	Ladder and iron post with jasta shop	
L1-NR-48	257+430	Iron post with jasta shop	
L1-NR-49	257+460	Jasta with iron post shop	

L1-NR-50	257+480	Jasta with iron post shop	
L1-NR-51	257+525	Iron post with jasta Shop	
L1-NR-52	257+855	Brick wall Shop	
L1-NR-53	257+860	Jasta Tea stall	
L1-NR-54	259+790	Bamboo Shop, zink roof	
L1-NR-55	259+885	Brick wall with jasta roof	

Annex 5.2: Annex for non-retained PAH Lot- 2

Unique ID	Chainage	Type of Structures	Remarks
Removed extended part temporary structures from original RAP			
L2-NR-1	262+345	Attached with Brick wall, zink sheet roof	The extended part temporary structures used for business is removed by them selves
L2-NR-2	262+620	Brick wall with jasta sheet roof	
L2-NR-3	262+740	Bamboo Workshop, zink roof	
L2-NR-4	262+980	Attached with Mud mortar House, zink roof	
L2-NR-5	263+375	Bamboo Shop, zink roof	
L2-NR-6	263+400	Wooden Shop, zink roof	
L2-NR-7	263+600	Attached with RCC Shop, zink roof	
L2-NR-8	264+315	Bamboo Shop	
L2-NR-9	271+340	Workshop roof with zink sheet	
L2-NR-10	271+360	Business Hub	
L2-NR-11	271+335	Business Hub	
Not found extended part temporary structures from original RAP			

L2-NR-12	261+410	Zink sheet roof	These PAH are not found during the latest verification due to inconsistencies in the earlier RAP information, including chainage and/or household information, and has therefore been retained in the reconciliation record for traceability.
L2-NR-13	262+945	Brick wall Hotel	
L2-NR-14	263+355	Jasta roof	
L2-NR-15	264+385	Brick masonry Wall with zink roof	
L2-NR-16	266+885	Bamboo Shop, roof with zink sheet	
L2-NR-17	283+195	Bamboo Shop, roof with zink sheet	
Saved extended part temporary structures of original RAP			
L2-NR-18	260+965	Attached with brick wall tin roof	All these extended part structures has negligible impact, just touch RoW
L2-NR-19	261+225	Bamboo Pillar with zink roof	
L2-NR-20	261+255	Attached with Mud mortar House	
L2-NR-21	261+420	Attache with RCC House, zink roof	
L2-NR-22	264+400	Brick masonry wall and jasta covering	
Identified as public structure from extended part temporary structure of original RAP			
L2-NR-23	264+730	Bamboo and jasta Shop	Identified as publicly used like waiting shed

Annex 5.3: Annex for non-retained PAH Lot- 3

Annex for non-retained Structures
