For
Environmental Safeguard Expert (ESE)

1.0 INTRODUCTION

Department of Roads established a unit called Environmental Management Unit under Planning Branch in the year 1988 to support the Arun Access Road for the proposed Arun-III Hydropower Project and reformed as a permanent cell under Planning and Design Branch with a new name as Geo-Environmental Unit (GEU) in the year 1994. In the beginning from 1994 to 1999 the unit remained supported with Overseas Development Agency (British) and World Bank financial support for Road Maintenance and Rehabilitation Projects. The British support was mainly focused in DoR's capability building and strengthening in Bio-engineering area whereas World Bank's support was focused in the field of Environmental sector.

Road construction often produces adverse effects on the Bio-physical as well as the Social, Economic and Cultural Environments. Realizing the importance of Social analysis and participation of project stakeholders in the planning and implementation of projects, aspect of Social assessment was incorporated for the improved project efficiency, effectiveness and sustainability as an integral part of the planning process.

Latter in the year 2005, DoR in its Master Plan for Strategic Road Network stressed on the Development of Road to supplement Poverty Reduction Program. After the initiation of implementation of enhancing poverty reduction impacts in some road projects in 2006, assisted by the foreign donors like ADB, the role of GEU was further realized to be expanded to incorporate the Social aspects of road construction and maintenance. Thus DoR has reformed GEU as Geo- Environment and Social Unit (GESU) to cover the Environment and Social aspect and render prompt and efficient services with the development and strengthening of the roads.

In order to implement safeguard measures envisaged under the RSDP, DoR intends to engage dedicated technical supports, externally hired experts, to assist Geo Environment and Social Unit(GESU), Development Cooperation Implementation Division (DCID), Project office and Division Roads Offices (DROs) throughout the contract period. Experts basically comprises with Environmental & Social experts directly responsible to the GESU and equally supporting to field based resources in resolving the Environmental & Social issues.

2.0 OBJECTIVE

Environmental and Social impact assessments on road development project are imperative to safe guard the Environment and to reduce and mitigate the negative impacts as well as to identify and enhance the beneficial ones. The sector wide Environmental and Social Management Framework (ESMF) has been prepared and approved by the government. It is the major guiding document for all the project proponents, developers and implementers to refer and pursue during planning and implementation of strategic road projects in Nepal. The ESMF which is consistent with GON and applicable IDA policies is to be used to all projects/subprojects through all cycle i.e. screening, selection, planning, implementation, monitoring and evaluation. The ESMF provides outlines how the government and IDA policy requirements are applied in the road projects along with various steps and procedures that need to be followed at different stages. The ESMF requires that each funding request/proposal be subject to environmental and social screening for potential environmental and social impacts to decide the level of environmental and social investigation that may be required. The ESMF provides criteria for such screening. The ESMF also recognize the need for stronger and independent monitoring of environmental compliance in the field. RSDP's institutional strengthening support also covers environmental capacity building of the GESU.

Social and environmental safeguard implementations are integral part of project execution. This should be carried out with the objective of sustainable development. The basic tenet of this consultancy service is to ensure that the environmental safeguard measures specified in ESMF in general and road specific measures in particular are complied with; and standard of living of affected people are restored or improved, all the resettlement and compensation measures are applied in practice, and all environmental mitigations measures are implemented.

The main objective of the consultancy service is to provide support GESU for the implementation of the environmental safeguard measures in RSDP and NIRTTP Projects as well as other donor funded projects and GON funded Projects.

3.0 SCOPE OF WORKS

With the above set objectives, the **Environmental Safeguard Expert**, whose work station shall be in DoR provided office space, now at chakupat; is required to assist GESU carrying following responsibilities to:

- Refining policies and procedures for the preparation, execution, monitoring, and evaluation of, Initial Environmental Examination(IEE), Environmental impact assessment [EIA] and Environmental management action plans [EMAP] for a project/program
- Review and refine TOR to carry out IEE, EIA and to prepare EMAP in consistent to ESMF in order to make these more relevant and specific to the proposed project
- Review ongoing tor, IEE and EIA reports, SSEMAPs and report the comments and suggestions to GESU

- Check BOQs, bids/contract clauses and other documents for each package for incorporation of relevant mitigation measures specified in IEEs, EIAs and SSEMAPs, and report the findings to GESU
- Develop and maintain Environmental monitoring and reporting system, and facilitate monitoring/check by GESU, Ministry
- Support GESU to undertake or undertake on behalf of GESU, the preparedness check and periodic compliance check,
- Monitor, evaluate the findings and recommendations, and report as well, for the implementation of IEE, EIA, and SSEMAP activities.
- Consolidate project wise environmental status separately for each projects highlighting the main issues and successes
- Assist GESU to Coordinate with other agencies, raise the awareness, disseminate information on Environmental aspects of road development among various stakeholders
- Support GESU in maintaining and updating environmental information of each project in a systematic manner and encourage development of environmental MIS in GESU
- Support GESU in preparing training packages and delivery of trainings
- Assist GESU to perform the Environmental roles and responsibilities as mentioned in Project appraisal Document for RSDP.
- Assist GESU for overall implementation of Environmental and Social Management Framework (ESMF)
