

Government of Nepal
Ministry of Physical Infrastructure and Transport
Department of Roads
Bridge Branch

Notice No. 03/BIMP/2079/80

REQUEST FOR EXPRESSION OF INTEREST (REOI)

Date of first publication: 4 December 2022 AD (2079/08/18 BS)

Name of project: Second Bridges Improvement and Maintenance Program (BIMP II)

IDA Credit No.: 6317-NP

Assignment Title: Updating the Bridge Inventory in Bridge Management System.

Reference No. (as per procurement Plan): NP-DOR-BIMP-II-CS-QCBS-BMS-04

The Government of Nepal has received financing from the World Bank toward the cost of the *Second Bridges Improvement and Maintenance Program (BIMP II)* and intends to apply part of the proceeds for consulting services. The main objective of the consulting services (the Services) is to update the bridge inventory in Bridge Management System. The specific objectives of the assignment are:

- Suggestion on updating of BMS with review of BMS facilities in terms of bridge inventory recording procedure, condition rating system of existing bridge, bridge maintenance priority procedure, and prioritization procedure for construction of new bridges;
- Recording and updating of existing bridge condition;
- Recording and updating new crossings with relevant data population;
- Preparation of Bridge Maintenance Investment Plan comprising Bridge Maintenance Management Plan and Bridge Construction Investment Plan separately;

Terms of Reference (ToR) is available in the website of the Department of Roads: <https://dor.gov.np/home/notices>

Anticipated date for commencement of the services is **June 2023** and the tentative duration of the assignment is about **11 months**.

Second Bridges Improvement and Maintenance Program (BIMP II), Bridge Branch, Department of Roads under the Ministry of Physical Infrastructure and Transport now invites eligible Consulting firms ("Consultants") to indicate their interest in providing the services. Interested Consultants should provide information demonstrating that they have the required qualifications and relevant experience to perform the services. The short-listing criteria are:

- Business objective and years in business (minimum 5 years)
- Organizational capability of the firm for the assignment
- General Experience of the Firm
- Specific Experience relevant to the assignment.

The attention of interested Consultants is drawn to paragraphs 3.14, 3.16, 3.17 of the World Bank's Procurement Regulations for IPF Borrowers, dated July 2016, revised November 2020 ("Procurement Regulations") setting forth the World Bank's policy on conflict of interest.

A consultant will be selected in accordance with the Quality and Cost Based Selection (QCBS) method set out in the Procurement Regulations. It is intended that short listed consultants will be invited to submit their technical and financial proposal as per the Request for Proposal document to be issued to them.

Consultants may associate with other firms in the form of a joint venture or a sub-consultancy to enhance their qualification. Consultants shall clearly state their association if any whether in the form of joint venture or sub consultancy in the Expression.

Interested Consultant may obtain further information about the service from the address given below during office hour.

Expression of interest must be delivered in written form to the address below (in person, or by mail, or by e-mail) by **22 December 2022 AD** within office working hour.

Second Bridges Improvement and Maintenance Program (BIMP II), Bridge Branch, Department of Roads, Chakupat, Lalitpur, Nepal, Tel: +977-1-5528771; Email: infobbpcu@gmail.com

A. INTRODUCTION

Department of Roads (DOR) is responsible for development and management of strategic roads and bridges in Nepal. Bridges are a major component for a reliable and efficient road system, facilitating movement of goods and passenger throughout the country. DOR has developed a web based software, **Bridge Management System (BMS)**, which was launched officially on 28 February 2013. BMS supports on the management of Strategic Road Network (SRN) Bridges with bridge inventory record, on systematic planning and prioritization for the Bridge sector investments in terms of maintenance of existing bridges and new bridge construction.

At present BMS database has record of 2022 existing bridges as attached in Appendix 1. Similarly it has database of 510 new crossings as attached in Appendix 2. Bridge Branch has record of 657 (attached in Appendix-3) new crossing which are on different stage of construction viz. new crossing identified, Bridge to be design, Bridges under design, Bridge under procurement, Bridge under construction and New Bridge Completed. Out of 657 new crossings, larger number of Bridges may be from 510 new crossings which are identified and recorded in BMS and remaining number of Bridges are additional Bridges which are identified after previous 2017 BMS update. Many of these bridges are in different stages of construction program including in planning, procurement, and construction.

BMS has facilities of keeping record of existing bridges and new crossing.

Existing Bridges:

- Bridges with construction completed, and in operation. BMS has record of detailed bridge inventory including condition data. the bridges with construction completed, and in operation, whose detailed bridge inventory including condition data yet to be uploaded on the BMS; (*missing to be in the BMS*)
- BMS has inventory of general details (*bridge length, width, carriageway width, location, road name, geographical coordinate*), construction details (*number of span, span length, super structure type, sub structure type*), history (*designed by, constructed by, year of construction*), condition assessment rating (0 to 4 and 0 to 9), schematic drawing of bridge (Plan, Profile & Cross Section), river training details and location plan of all the existing bridges (2022 number of Bridges).

New Crossings:

Includes:

- ***Bridges in Planning Stage:***
 - All new crossings identified in the SRN may be either in feasibility report, new crossings enlisted in the red book, new crossings enlisted in previous update of BMS under new crossing, and new crossings identified in Feeder/ Local/Urban roads
- ***Procurement Stage (Construction):***
 - SRN bridges which are under different stages of procurement either in detail design or including construction
- ***Under Construction:***
 - SRN bridges which are under construction and yet to be in operation stage

- BMS has inventory of basic details (*tentative bridge length to be constructed, geographical coordinate, location, road name, chainage, location map, photographs*), without condition assessment and rating for the new crossings (509 number of bridges).

The BMS is a dynamic planning tool for guidance to investment in the bridges for management. It requires regular update its inventory in existing bridges and new crossings. The changes in the status of existing bridges and new crossings have to be systematically assessed and updated in the BMS database. Department of Roads, Bridge Branch aims to update inventory of existing bridges and new crossings in Bridge Management System under Second Bridges Improvement and Maintenance Program (BIMP-II) supported by the World Bank.

DOR, Bridge Branch (herein as “the department”) intends to utilize services of engineering consulting firm/s providing engineering services for updating inventory of existing bridges and new crossings in BMS.

B. OBJECTIVES

The main objective of this consultancy service is to update existing database related to Bridges in web based “Bridge Management System (BMS)” including followings:

- Suggestion on updating of BMS with review of BMS facilities in terms of bridge inventory recording procedure, condition rating system of existing bridge, bridge maintenance priority procedure, and prioritization procedure for construction of new bridges;
- Recording and updating of existing bridge condition;
- Recording and updating new crossings with relevant data population;
- Preparation of Bridge Maintenance Investment Plan comprising Bridge Maintenance Management Plan and Bridge Construction Investment Plan separately;

C. SCOPE OF WORKS

The consulting service includes following scope

i. Suggestion on updating of BMS facilities

- Review of BMS facilities in terms of:
 - bridge inventory recording procedure;
 - bridge maintenance prioritization procedure;
 - prioritization procedure for construction of new bridges including existing multi-criteria analysis (MCA).
- Review of recorded inventory in BMS.
- Review the Bridge condition rating system (0 to 4), and Bridge condition rating system (0 to 9).
- Review Bridge Maintenance Management System being practiced, particularly, in the regional countries through available literatures and suggest improvement in adopted Bridge Maintenance Management Plan.

Reference

Bridge Inspection Manual (DOR)

Rating Guidelines

Condition Rating	Condition
4	Serious condition with severe damage. The element or component is not functioning as designed
3	Poor condition The element or component shows numerous defects of structural significance which may soon prevent it from functioning as designed.
2	Below average. The element or component shows local defects of structural significance but functions as designed.
1	Fair condition. The element or component shows a few non-structural defects
0	Good condition with no significant defects.
N	Not applicable, or element not accessible for inspection

Extent Rating	Area affected by Damage or Deterioration Rating
4	Extensive, most or all of the element affected.
3	Major, highly significant, more than 20% of the element affected
2	Significant, 5% to 20% of length or area of the element affected
1	Minor, less than 5% of length or area of the element affected
0	No defect or insignificant length or area of the element affected

Urgency Rating	Time to execute remedial works
4	Immediate attention required
3	Attention required within 6 months (generally before the monsoon or in the present fiscal year).
2	Attention required within year.
1	Non-urgent, attention required within 2 years.
0	No time limit for action

Condition Rating adopted for BMS 2016

Description	Rating
Not applicable	10
New condition	9
Good condition—no repairs needed	8
Generally good condition—potential exists for minor maintenance	7

Generally good condition—potential exists for minor maintenance	6
Generally fair condition—potential exists for minor rehabilitation	5
Marginal condition—potential exists for major rehabilitation	4
Poor condition— repair or rehabilitation required immediately	3
Critical condition—need for repair or rehabilitation urgent. Facility should be closed until the indicated repair is completed	2
Critical condition - facility is closed. Study should DETERMINE THE FEASIBILITY FOR REPAIR	1
Critical condition - facility is closed and IS BEYOND REPAIR.	0

Extent (e)	
e.1	Insignificant
e.2	Minor (about 5% of length/area/volume affected)
e.3	Significant (>5%,<20% affected)
e.4	Considerable (>20% affected)

Severity (s)	
s.1	Insignificant
s.2	Minor
s.3	Significant, must check within 6-12 months
s.4	Considerable, Urgent attention required

- Conduct gap analysis in existing features of BMS. BMS shall capture additional information related to nearby settlements, encroachment, road safety on bridge and approach roads, major changes in river flow pattern over the time.
- Conduct SWOT analysis and suggest changes/modification on bridge condition rating system (0 to 4 and 0 to 9) based on best practices.
- Suggest changes/modification on Bridge Construction Priority System based on best practices
- Agree on additional information related to nearby settlements regarding Urban, Semi Urban, Rural; encroachment on bridge and around approach road; road safety with respect to black spot zone, walkway, footpath in bridge and approach road, shoulder in approach road; Barrier-flexible as wire/cable, semi-rigid-W metal beam crash barrier, gabion; rigid as masonry block, plum concrete wall; bridge name plate; hydrological information as major change in river flow pattern as meandering; side channelization of water course; scouring of river bed in upstream & downstream, flood vulnerability in vicinity of bridge, river bank, embankment, etc; Sensitive zone as National park, wild life reserves, wetland, conservation land, buffer zone, etc.; topography and terrain of bridge location as Plain, Rolling, Mountainous and Steep terrain.

ii. *Updating of Bridge Inventory and condition rating of Existing Bridge*

- Consultant may use mobile based app agreed with the Employer for Bridge condition assessment data capturing.
- Consultant shall capture and populate the change in condition in Bridge components and bridge structure as a whole.
- Update and assign a unique bridge number for each Existing bridge based on New Highway. However, no change in previous Bridge code shall be made in order to avoid confusion in future, and data sheet shall show both existing and new bridge code.
- Location of the bridges shall be updated.
- Each bridge shall be plotted on GIS-based map of Nepal with its identification code
- Consultant shall capture and populate Bridge details such as bridge type such as RCC T-girder, plate girder, truss, arch, suspension, cable stayed etc.; length, span numbers, carriageway width, abutment type, pier type, foundation types, bearings, expansion joints, footpath with dimensions, bridge deck surface type, railings, road signs, river training works in vicinity to bridge, in waterway, noticeable change in watercourse, utility services, bridge locality (Urban/semi-urban/rural), terrain (plain/rolling/mountainous/steep), bridge site location (National Park/Wildlife reserve/Conservation area/Wetland/Buffer zone/Sensitive area) and any other relevant data shall be provided.
- Consultant shall capture and populate Road safety details and any other relevant data to be provided.
- Consultant shall capture and populate Hydrological information and any other relevant data shall be provided.
- Consultant shall capture and populate history of the bridge such as information on designer, funding source, construction completion year, other information on past maintenance activities on the bridge, as built or design & drawings (obligation to all new bridges and subject to availability of design drawings for existing bridges) and environmental & social reports (if any) shall be provided.
- Consultant shall capture and populate photographs of each bridge with following views shall be provided:
 - Overall upstream side view of the bridge;
 - Overall downstream side view of the bridge;
 - View of abutments and piers;
 - View of deck surface;
 - View of river training works;
 - Approach road of bridge;
 - Any other views that expresses the conditions of the bridge;
- Consultant have to produce a list of existing bridges on the road network requiring replacement/widening/strengthening/rehabilitation due to capacity constraints or condition. And it shall prepare a prioritized list upon consultation with Client, potentially using bridge maintenance priority procedure. It shall include those aging bridges whose safety and serviceability are in questionable conditions;

- Consultant shall capture and populate any missing information as well as additional information & updating the existing information of the bridges
- Consultant shall carry out condition assessment and populate the existing conditions of the bridges in the Bridge Management System (BMS)
- Consultant shall perform condition assessment of bridge based on the reviewed bridge condition rating system upon consultation with Client.
- Consultant shall prepare the comparative condition assessment report in specified format upon consultation with Client. Comparative condition assessment report shall clearly encompasses the changes in the condition of existing Bridge from previous condition rating capturing at least three major changes.

iii. *Recording and updating of New Crossing with relevant data population*

- New crossing which are in *planning stage*, Consultant shall identify and record basic inventory details comprising tentative bridge length to be constructed, geographical coordinates, location, road name, chainage, location map, photographs etc., upon consultation with Client.
- Bridges which are under *construction stage*, though, those should be included under new crossing by definition, Consultant shall provide not only inventory of basic details but also shall provide details such as bridge type (RCC T-girder, plate girder, truss, arch, suspension, cable stayed etc.), length, span numbers, carriageway width, abutment type, pier type, foundation types, bearings, expansion joints, footpath with dimensions, bridge deck surface type, railings, road signs, river training works in vicinity to bridge, aggradation/degradation in waterway, noticeable change in watercourse, utility services, bridge locality (Urban/semi-urban/rural), terrain (plain/rolling/mountainous/steep), bridge site location (National Park/Wildlife reserve/Conservation area/Wetland/Buffer zone/Sensitive area) and any other relevant data upon consultation with Client.
- Photographs of each new crossing/bridges with following views shall be provided:
 - Overall upstream side view of the bridge;
 - Overall downstream side view of the bridge;
 - Approach of bridge
 - Any other views that expresses the conditions of the bridge
- List of updating of inventory of new crossings/bridges that are under planning, procurement and construction are attached in Appendix 2 and Appendix 3.
- Updating of river/stream crossings that requires construction of permanent bridges on strategic roads (Appendix 6). Currently there are 80 numbers of National highway (approved by Council of Ministers, Government of Nepal in 2076/02/06) attached in Appendix 6. Consultant shall identify the new crossing and update the inventory in BMS.
- Updating and assigning a unique bridge number for each new crossing based on New Highway. However, no change in previous bridge code is made in order to avoid confusion in future and data sheet shall show both existing and new bridge code.

- Each new crossing shall be plotted on GIS-based map of Nepal with its identification code
- The consultant shall review the existing prioritization system adopted for construction of new bridges/ new crossing and suggest changes/modification based on best practices upon consultation with DOR. The existing system is based on a scoring system (multi-criteria based analysis ‘MCA’) on variables such as:
 - Importance of roads (based on government policies and programs);
 - Road type
 - Highways (east-west, north-south etc.)
 - Feeder Road (major and minor) e.g. roads connecting major tourist spots etc.
 - Proposed feeder roads
 - Important roads
 - Important urban roads etc.
 - Traffic volume;
 - Socio-economic status etc.
- Review the best practice of prioritization of construction of bridges in new crossings anywhere else, particularly, in the regional countries. Based on best practice and discussion with Client, the Consultant has to suggest modification on the variable or criteria of prioritization.
- Construction prioritization list of identified New Crossings shall be prepared. Consultant shall identify the bridges under construction, construction completed but yet to be on operation. These bridge may be recorded under new crossing. The bridges which are on operation shall be included on the BMS database under existing bridges. Data update shall follow as discussed under "Updating of Bridge Inventory and condition rating of Existing Bridge".

iv. Preparation of Bridge Maintenance Investment Plan

- Consultant shall prepare the Bridge Maintenance Investment Plan based on updated information. Consultant shall develop a template of “Bridge Maintenance Investment Plan” upon consultation with Client. This maintenance investment plan shall comprise of bridges with condition assessment, maintenance intervention plan, costing for planning & budgeting purpose. Moreover, Consultant shall prepare Bridge Maintenance Management Plan separately. Bridge Maintenance Management Plan shall be included as a section under Bridge Maintenance Investment Plan.
- Consultant shall prepare Bridge Maintenance Management Plan based on Bridge information updated in BMS such as condition assessment, prioritization criteria, etc. Bridge Maintenance Management Plan needs to categorize bridge wise details on following maintenance classes:
 - **Routine Maintenance:** It involves routine activities to be conducted in a cyclic manner. The scope of work of routine maintenance are included in Table 1. Routine maintenance to be carried out in all other maintenance interventions except in case the bridge is washed way.
 - **Recurrent Maintenance (Minor Repairs works):** It involves minor repairs works, which do not require any design input to carry out the

treatment or rectify the defects. The scope of work of recurrent maintenance are included in Table 1.

- **Major Maintenance (Critical/Special/Urgent):** It involves repair works requiring detailed investigation to design the repair works. The scope of work of major maintenance are included in Table 1.
- **Emergency Maintenance:** One or more elements of the bridge is heavily and critically damaged that compromises the safety of the traffic using the bridge. Emergency repair of one or more parts are required followed by major maintenance of the bridge; Load restriction and traffic safety signs need to be put in place. The scope of work of emergency maintenance are included in Table 1.
- The condition rating in each maintenance class shall be as given below or upon consultation with Client:

Maintenance Class	Condition Rating (0 to 9)	Maintenance Intervals <i>(Regarding maintenance interval review Guideline for Inspection and Maintenance of bridges Vol-1 & Vol-2)</i>
Routine Maintenance		As per Guideline for Inspection and Maintenance of bridges Vol-1,
Recurrent Maintenance	5-7	Guideline for Inspection and Maintenance of bridges Vol-2-Minor repair (Recurrent Maintenance)
Major Maintenance (Critical/Special/Urgent)	2-4	It's one time repair works, then the Routine and Recurrent Maintenance will be effective for the bridge
Emergency Maintenance	0-1	Once bridge is in critical condition,/in emergency, it could endanger the safety of traffic using the bridge. So facility will have to be closed until damages are repaired or replaced the bridge. Once bridge is safe to operate, it will be subjected again to Routine and Recurrent Maintenance.

Table 1: Class of bridge maintenance and scope of work

Class	Diagnostic	Scope of work
-------	------------	---------------

1. Routine Maintenance	No significant defect & no replacement or repair of any element of the bridge is required. The work involves routine activities to be conducted in a cyclic manner. RM is defined as the servicing of a bridge structure	• Removal of debris(soil, aggregate, cow dung and or any foreign material) from deck, footpath, railings, bearing, expansion joints; • Cleaning and lubrication of bearing; and • Removal of grass, bushes from bridge surfaces, wing and or abutment wall, bearing area approach road • Cleaning of drainage spout on the deck • Drain out the accumulated water in the chambers, cleaning and re-greasing of main and hanger cables for suspension bridge and check the abnormal vibration of stay –cable for cable-stayed bridge.
2. Minor Maintenance	Damages detected are very minor and do not require any design input to carry out the treatment or rectify the defects.	• Rectification and replacement of bridge expansion joints, railing posts, safety barriers, sign board; • Rectification damages of approach slabs, ballast walls etc. • Minor bed protection to minimize scour required to keep the foundations unexposed, bank protection in order to prevent breaching of approach road; • Tightening of loose bolts/ U-hooks, replacement of missing knot bolts in the steel members, spot re-painting work of steel members of suspension as well as cable-stayed bridge. Reporting to DRO office in case of abnormal vibration of cable system during wind.
3. Major Maintenance (Critical/Special/Urgent)	• Numerous defects of structural and hydraulic significance which may soon prevent the bridge in its proper functioning. • Detailed investigation may be required to design the maintenance work (e.g. non-destructive testing)	• All or some of the minor maintenance work scope plus • Major repair/replacement of slabs/ railings, bearings, piers • Painting and replacement of steel members • Greasing, covering of cables, changing of deck material and tightening or replacing bolts, inspection of anchoring system etc. of suspension /cable-stayed bridge • Bed and or bank protection works (River training works) costing more than 0.3 million rupees • Major maintenance of decking system and re-painting of steel members • Seeking expert advice for major maintenance of anchorage system, main cable/hanger, cable/suspension devices/saddles for suspension bridges and also stay-cable pylon/tower and anchoring devices at pylon as well as at deck for cable-stayed bridges • Jacketing of pier columns
4. Emergency Maintenance	• One or more elements of the bridge is heavily and critically damaged that compromises the safety of the traffic using the bridge; • Emergency repair of one or more parts are required followed by major maintenance of the bridge; • Load restriction and traffic safety signs need to be put in place	• All or some of the minor maintenance work scope plus • Major repair/replacement of slabs; and/or • Major repair/replacement of railings • Major repair/replacement of piers; and/or • Repair rehabilitation or new construction of check dam when the bridge is at risk from scour • Remedial measures as advised by experts after investigations shown in scope of works for Major Maintenance.

- Prepare Bridge Maintenance Management Plan based on bridge condition assessments and priority ranking for each bridge under each maintenance category for Routine, Recurrent, Major (Critical/Special/Urgent) and Emergency upon consultation with Client.

Identification of bridges in need of major (special/critical/urgent) maintenance and emergency maintenance with detail bridge condition assessment and implementation plan capturing cost for budgeting purpose upon consultation with Client.

Preparation of Bridge Construction Investment Plan Consultant shall prepare the Bridge Construction Investment Plan based on updated information available in BMS.

- Consultant shall develop a template of "Bridge Construction Investment Plan" for new bridge construction upon consultation and discussion with Client.
- This investment plan shall comprise of bridges with Bridge Construction Investment Plan (based on multi-criteria analysis) and costing for planning & budgeting purpose.

v. Drone Use

Consultant shall conduct drone survey at the periphery of the bridges to acquire sufficient information. The drone survey shall capture information upstream and downstream of the bridge to the sufficient length as agreed with the Client. Emphasis shall be given to river training works, landslides, settlements in river banks, forestation/deforestation, encroachment along the approach roads and on the river banks etc. The bridges where drone can be used are as per requirement of bridge site upon consultation with Client. The list of bridges (indicative) where drone survey need to be carried is attached in Appendix 4.

vi. Bridge Inspection Vehicle Use

Consultant shall use Bridge Inspection Vehicle for conducting detail condition assessment of selected bridges. The bridges where bridge inspection vehicle can be used are as per requirement of bridge site upon consultation with Client. The list of bridges (indicative) where bridge inspection vehicle need to be carried is attached in Appendix 5.

D. TRANSFER OF KNOWLEDGE AND CAPACITY BUILDING

The Consultant shall consider the technology and knowledge transfer as an important aspect in carrying out the assignment. The Consultant shall support Department of Roads, Bridge Branch and Road Divisions personnel to build their capacity in BMS update as a part of the on the job training and propose the specific training methods & modules for the Capacity enhancement in the Bridge condition assessment and BMS update. The consultant will provide the on-the-job exercise and practices on-field survey, data collection, data analysis, Condition Assessment of Bridges. The cost for such training shall be borne by the consultants. Moreover, innovative approaches for training on bridge condition assessment shall be proposed by Consultant based on the past experiences, modern technique and innovation.

E. REPORTING REQUIREMENT AND TIME SCHEDULE

The consulting services shall be implemented over 11 (months) from the commencement date. All documents shall be prepared on original stable reproducible materials and have title blocks, reference numbers. The consultant shall submit the reports in specified manner and as enumerated in Table-2: Time Frame for Reports and Submissions.

The consultant shall also submit:

- i. Inception Report in five (5) hard copies and a soft copy;
- ii. Monthly Progress Report in five (5) hard copies and a soft copy;
- iii. Draft Report in ten (10) hard copies and a soft copy;
- iv. Final Report in ten (10) numbers of hard copies and a soft copy

Table-2: Time frame for Reports and Submissions

S.NO.	Preparatory Outputs	Submission Deadline (no. of months after the commencement date)
1.	Inception Report	1
2.	Monthly Progress Report	Every Month (8 number)
3.	Draft Report (Comparative Condition Assessment Report, Bridge Maintenance Investment Plan including Bridge Maintenance Management Plan, Bridge Construction Investment Plan)	10 Month
4.	Final Report (Comparative Condition Assessment Report, Bridge Maintenance Investment Plan including Bridge Maintenance Management Plan, Bridge Construction Investment Plan)	11 Month

Report description

1. Inception Report

Inception report include overall understanding of the ToR, and the content shall be discussed with Client before proceeding to the field. The report shall contain information on the general approach (particularly details of Methodology which is proposed for carrying out the consultancy for services) including such detailed information as the consultant deems relevant (various formats to be used such as Inventory Forms, Condition Survey), together with a bar chart that would indicate the Consultant's estimate of the duration (separately in the office and in the field), and the planned input of each professional staff member to be used, and the consultants estimate of the total man-months required to complete the work and services. The consultant is required to present the Inception report to Client for review and comments.

2. Monthly Progress Report

Consultant shall submit Monthly Progress Report in every month. The report shall be in the format upon consultation with Client. The monthly reports shall contain the progress of work accompanied by a briefing session and plan for successive month.

3. Draft Report

Draft Report includes the following report:

- Bridge Condition Assessment Report

- Comparative Condition Assessment Report
- Bridge Maintenance Investment Plan comprising Bridge Maintenance Management Plan
- Bridge Construction Investment Plan

The Consultants shall arrange presentations of draft report to Client. The consultant may also be asked to demonstrate correctness of Data base system by using existing MIS based Bridge Management System to the DOR audience. They shall review the issues and comments raised during the presentation while finalizing the report and make necessary amendments/corrections if needed. The cost for such presentations shall be borne by Consultant.

4. Final Report

Final report shall be submitted addressing the comments and suggestions received by the Consultant.

F. TEAM COMPOSITION AND QUALIFICATION REQUIREMENT FOR KEY STAFFS

Tentative person month detail required for the assessment is provided under table below and the qualification requirement for evaluation of key staff is set out in **Appendix 7**:

S.No.	Description	Number of Staff (Quantity)	Total Person Months	Remarks
1	Team Leader (Senior Bridge Engineer)	1	11	<i>Key Personnel</i>
2	Deputy Team Leader(Bridge Engineer)	1	8	<i>Key Personnel</i>
3	Geo-Technical Engineer	1	5	<i>Key Personnel</i>
4	Hydrologist	1	5	<i>Key Personnel</i>
5	Transport Economist	1	2	<i>Key Personnel</i>
6	Sociologist	1	2	
7	Environmentalist	1	2	

S.No.	Description	Number of Staff (Quantity)	Total Person Months	Remarks
8	Civil Engineer	10	47	
9	Computer Engineer	1	5	
Total		18	87	

Note:

The above Key Staff composition and estimated total staff man-month is client's estimate. The consultant is advised to assess their own requirement and propose their own staff composition and staff input requirement for efficient performance of their job as per the Terms of Reference. If the proposed consultant's team is found inadequate or not sufficient during the performance of the services, then additional staff shall be provided by the Consultant at their own cost

G. CONSULTANTS FACILITIES, CLIENT'S INPUT AND COUNTERPART PERSONNEL

Consultant shall be fully responsible to mobilize the necessary key staff and also should arrange all the administrative, technical and support staff needed to carry out the services. Consultant shall conduct condition assessment on existing bridges and crossing assessment on New crossing by dedicated Team. Field data collection on existing bridges and New crossing shall be performed by 5 survey team. Each team comprising of 2 Civil Engineer and 1 support staff. So totaling of 10 Civil Engineer shall mobilize on field. Each team shall mobilize to field on 4-WD vehicle. In addition, key personnel may assess to critical & special bridge sites based on necessity. Consultant shall also be responsible for providing all other necessary facilities and logistical support for its staff including accommodation, transportation, office equipment, communications, utilities, office supplies and other miscellaneous requirements that are required to complete all the tasks to fulfill the objective and scope of works, and it shall be included in their financial proposal.

Consultant shall be fully responsible to manage the necessary tax/ VAT registration and necessary payment and clearance on the same.

H. DOR TO HAVE COMPLETE ACCESS TO ALL INFORMATION

DOR shall have complete access to all the information including any software used by Consultant and DOR shall have the rights to distribute this within the Department or modify it accordingly. DOR will have the copy right of all the data/information under this agreement.

I. INFORMATION TO BE PROVIDED BY THE GOVERNMENT

The Government shall provide Consultant following documents and services subject to availability:

- Access to the Bridge Management System; Bridge Maintenance Manual Volume I and II free of cost;

J. INFORMATION TO BE OBTAINED BY CONSULTANT

Any relevant DOR documentation for the project shall be obtained from DOR Offices and reproduces with the permission of DOR at the expense of the consultant itself. Consultant shall obtain information on relevant bridges from the concerned Division Road Offices, Road Projects or any other agencies.

K. LIAISON WITH OTHER AGENCIES

In case Consultant requires the cooperation of Government Departments and Agencies, the DOR shall provide liaison and shall assist the Consultant to gather information required for the completion of the project.

Consultant is required to maintain close liaison with the Bridge Branch. In particular survey methods and tools for evaluation and inspection should be agreed upon with the Bridge Branch.

L. GOVERNMENT INDEMNITY

Consultant shall be responsible for any damage to life and property that may arise out of their works and they shall take all necessary insurance cover to indemnify the Government from any for compensation that may arise through negligence.

APPENDIX

Appendix 1: Bridge list of Existing Bridges recorded in BMS (2022 nos.)

Appendix 2: Bridge list of New Crossing recorded in BMS (509 nos.)

Appendix 3: Bridge list of New Crossing under various stage i.e. Planning, Procurement and Under-construction (657 nos.)

Appendix 4: Bridge list for use of Drone in bridge condition assessment

Appendix 5: Bridge list for use of Bridge Inspection Vehicle in bridge condition assessment

Appendix 6: List of National Highway in Strategic Road Network (SRN)

Appendix 7: Qualification Requirement of Staff

APPENDIX 7: Qualification Requirement of Staff

The working team for field and office works should necessarily consist of the following Personnel with qualification and experiences as indicated in the following table. These professionals shall be:

I. Team Leader (Sr. Bridge Engineer) (Experience of the last 15 years will only be considered)

A. Education Qualification	
Minimum	Master's degree in Bridge / Structure Engineering
Preferable	Ph. D degree in Civil Engineering
B. Experience	
B1. General Experience	
Minimum	10 years
Preferable	15 years
B2. Specific Experience in new bridge design or design of maintenance works or construction of bridge works	
Minimum	8 years
Preferable	12 years
B3. Specific Experience (In the capacity as a Team Leader in bridge design or design of maintenance works or construction of bridge works)	
Minimum	5 number of bridges
Preferable	12 number of bridges
C. Experience in the Proposed Field of Expertise	
C1. Shall have experience in conducting bridge condition assessment in at least one service	
C2. Shall have experience in review or preparation of bridge investment plan/bridge maintenance guidelines/manual	
C3. Shall have experience of bridge design or design of maintenance works or supervision of construction of bridge works in at least two services funded by World Bank or other donor agencies	
D. Language	
Communicate fluently in English Language	

II. Deputy Team Leader (Bridge Engineer/Structure Engineer) (Experience of the last 10 years will only be considered)

A. Education Qualification	
Minimum	Master's degree in Bridge / Structure Engineering
Preferable	Ph.D in Civil Engineering
B. Experience	
B1. General Experience	
Minimum	8 years
Preferable	10 years
B2. Specific Experience in bridge design or construction works or Bridge condition assessment	
Minimum	5 years
Preferable	8 years
B3. Specific Experience (In the capacity as a Bridge Engineer in proposed field of Expertise works)	
Minimum	5 number of bridges
Preferable	9 number of bridges
C. Experience in the Proposed Field of Expertise	
C1. Shall have experience in bridge condition assessment in at least one service	
C2. Shall have experience of bridge design or design of maintenance works or construction of bridge works in at least two services funded by World Bank or other donor agencies	
D. Language	
Communicate fluently in English Language	

III. Geo-Technical Engineer (Experience of the last 10 years will only be considered)

A. Education Qualification	
Minimum	Graduate in Civil Engineering
Preferable	Master's degree in Geo-Technical Engineering
B. Experience	
B1. General Experience	
Minimum	8 years
Preferable	10 years
B2. Specific Experience (In the capacity as a Geo-Technical in design of bridge works)	
Minimum	5 number of bridges
Preferable	8 number of bridges
C. Experience in the Proposed Field of Expertise	
C1. Experience in one Donor funded Project	
D. Language	
Communicate fluently in English Language	

IV. Hydrologist (Experience of the last 10 years will only be considered)

A. Education Qualification	
Minimum	Graduate in Civil Engineering
Preferable	Master's degree in Hydrology / Water resource engineering
B. Experience	
B1. General Experience	
Minimum	8 years
Preferable	10 years
B2. Specific Experience (In the capacity as a Hydrologist in design of bridge works)	
Minimum	5 number of bridges
Preferable	8 number of bridges

C. Experience in the Proposed Field of Expertise	
C1. Experience in one Donor funded Project	
D. Language	
Communicate fluently in English Language	

V. Civil Engineer-10 [Civil Engineer 1, Civil Engineer 2, Civil Engineer 3, Civil Engineer 4, Civil Engineer 5, Civil Engineer 6, Civil Engineer 7, Civil Engineer 8, Civil Engineer 9, Civil Engineer 10]

A. Education Qualification	
Minimum	Bachelor's degree in Civil Engineering
B. Experience	
B1. General Experience	
Minimum	5 years
B2. Specific Experience (In the capacity as a civil engineer in road/bridge works)	
Minimum	3 years
C. Language	
Communicate fluently in English Language	

VI. Transport Economist

A. Education Qualification	
Minimum	Masters in Transport Economics or equivalent
B. Experience	
B1. General Experience	
Minimum	8 years
B2. Specific Experience (In the capacity as a Transport Economist in road/bridge project)	
Minimum	5 years
C. Language	
Communicate fluently in English Language	

VII. Sociologist

A. Education Qualification	
Minimum	Graduate in Social Science
B. Experience	
B1. General Experience	
Minimum	5 years
B2. Specific Experience (In the capacity as a Sociologist in road/bridge project)	
Minimum	3 years
C. Experience in the Proposed Field of Expertise	
C1. Experience in at least two road project supported by development partners	
D. Language	
Communicate fluently in English Language	

VIII. Environmentalist

A. Education Qualification	
Minimum	Graduate in Civil Engineering/Environmental Engineering/Environment Science
B. Experience	
B1. General Experience	
Minimum	5 years
B2. Specific Experience (In the capacity as an Environmentalist in road/bridge works)	
Minimum	3 years
C. Experience in the Proposed Field of Expertise	
C1. Experience in at least two road project supported by development partners	
D. Language	
Communicate fluently in English Language	

IX. Computer Engineer

A. Education Qualification	
Minimum	Graduate in Computer Engineering/ Computer Science/ Information Technology
B. Experience	
B1. General Experience	
Minimum	5 years
B2. Specific Experience (In the capacity as a Computer Engineer in Computer programming, database design and data management)	
Minimum	3 years
C. Language	
• Communicate fluently in English Language	

Appendix 1: Bridge list of existing bridges recorded in BMS (2022 nos.)

S.No.	Bridge Number	Bridge Name	Road Name	District	River/Stream	Chainage (Km)	Length (m)	Width (m)	Span No	Region	Completion Year	Coordinate	Bridge Type	Bridge Condition	Total Score	Construction Status	Data Updated Year
