Design _____
Drawn _____
Dr. A. J. J. J. J.
Project Engineer

1. What is the purpose of the study?
 To determine the effect of the new drug on the rate of recovery from the disease.

2. What are the independent and dependent variables?
 Independent variable: Time (in days)
 Dependent variable: Rate of recovery (in days)

3. What is the hypothesis?
 The new drug will result in a faster rate of recovery than the old drug.

4. What are the results?
 The new drug resulted in a faster rate of recovery than the old drug.

5. What are the conclusions?
 The new drug is more effective than the old drug.

6. What are the limitations of the study?
 The study was limited to a small number of subjects and did not include a control group.

7. What are the implications of the study?
 The study suggests that the new drug may be a better option for treating the disease.

8. What are the future directions of the study?
 Further studies should be conducted to confirm the results and to determine the long-term effects of the new drug.

9. What are the references?
